REALISATION OF WORKSHOPS

Deliverable 15 is the realisation of the workshops. The workshops will serve as a platform for updating the stakeholders on RTD actions, their relations to policies and the professional sectors of fisheries and aquaculture. They will also provide an interactive forum for debate on the role of European RTD and how it can support the needs of and issues facing of European fisheries and aquaculture and their individual sub-sectors.

The workshops will each provide the opportunity for presentation and debate of the issues identifies by the different sub-sectors of European fisheries and aquaculture, putting accent on regional specificities. Key speakers will provide the background topics and guidance, while experienced professionals will discuss these issues in the light of their experience. Discussion and debate on the identified problems and requirements of the sector for RTD projects will be led by the Chairs/Rapporteurs, whose preliminary results will be made available in Session IV.

The progress and achievements of the project partners and thematic networks dedicated to fisheries and aquaculture will be presented on demonstration stands, providing documentation and project displays.

The Profet Policy project organises 9 workshops during the course of the project. The realisation of the second workshop is discussed in this document.

Seventh Profet Policy Workshop: North Sea Fisheries

Copenhagen (Denmark), 23 & 24 June 2008

This workshop was held for all stakeholders of the fisheries sector in the Northern countries. It served as a unique platform for the exchange of views and opinions on future research needs and other critical issues affecting North Sea fisheries.

The workshop was arranged in four sessions:

- North Sea Fisheries - an introduction to the issues
- North Sea Fisheries - its role today and in the future
- North Sea Fisheries - how can research programmes help advancing fisheries management?
- Communication of Research Results

In all, 20 presentations were given covering a broad range of disciplines including biology, socio-economic and modelling.

The scope of the sessions is explained in more detail in deliverable report nr. 14 'Individual workshop scope and objectives'.

Target audience of the Workshop

The workshop was attended by 55 participants from 14 European countries and the US. The audience covered scientists, fishery managers, science directors, science and fishery international organizations, government representatives, NGO's and other stakeholders.

The workshop was held in English.

Organisation

The workshop was organized by the International Council for the Exploration of the Sea (ICES)

Contact person: Adi Kellermann

General information

The workshop was opened by Mr Adi Kellermann, Director of ICES and organizer of the event. The workshop focussed mainly on high level science and many North Sea related projects were presented. Representatives from NGOs and the North Sea RAC were also invited to make a presentation. Mr Mario Lopes dos Santos and Mr Poul Degnbol, both from DG Research (EC) attended the meeting; while the first one gave a review of the Research and Technology Frameworks, past and present, the other explained the close relationship between the future Common Fisheries Policy and the role of science.

'Maintaining the dialogue' was the watchword of the workshop. All participants considered the event as a big step forward in communication and more interaction, and especially the representatives of the fishery expressed their open view about maintaining the dialogue with science.

Hotels

Participants had to book and pay for the accommodation themselves. List of available hotel near the conference Centre were provided online.

Registration and registration fee

The participants could register and pay online with a credit card or bank transfer on the website of ICES. The participants could also download the registration form and submit it by letter and fax. The registration fee was € 60, covering the coffee breaks, a dinner buffet on 23 June and a lunch buffet on 24 June.

Compilation of Technical Leaflets

Specific printed compilations that relate to the individual workshop theme are provided to each participant. The compiled abstracts will act as a stimulus for stakeholder attendance, where circulation will be made in printed form (through networks & Associations) as well as electronically (using the Project Partner and Network websites).

Compilation of abstracts

The presenters of the presentations received well in advanced the guidelines for preparing abstracts and presentations. The guidelines provided some advice for setting up the presentation and gave information about the expected audience of the workshop.

Each presenter had to deliver a short abstract of their presentation in English (10-15 lines) and a short (5 line maximum) biography to ICES two weeks before the workshop. The abstract and the biography were distributed at each Workshop.

The guidelines for preparing abstracts and presentations and the compilation of abstracts of the workshop in Copenhagen can be found in Deliverable report nr. 16: 'Workshop presentations'.

Posters

A special place was reserved to present posters
