

## **Annex – List of questions to be answered by the participants**

- (1) What is your experience with the present data access scheme?
- (2) How do you consider that the new proposed approach will satisfy the needs of the GMES community at large, and the GMES services in particular?
- (3) Do you consider that the list of core data sets is complete, or are there other core data sets necessary for a large community of users? Please be specific.
- (4) Some additional data sets have already been identified so far on the basis of the current projects. Do you consider other data sets should be mentioned at this stage?
  - (a) Would the additional data sets benefit a reasonably large community of users? Please be specific.
  - (b) Is the proposed quota mechanism flexible enough to accommodate further needs?
- (5) Is there any duplication with existing EO data procurement schemes? Which of your data requirements do you see being shared by other users? Can you set priorities among your data requirements?
- (6) Can you prioritise among different cost drivers
  - (a) amount of data
  - (b) timeliness of delivery
  - (c) size of the user licence
