

Global Ship Density - Fishing vessels

Average N° of Ships per 1° x 1° grid

1:37,000,000

**average ship density
per grid cell**

Data Processing: LUXSPACE 5/2010
 Data Source: Orbcomm S-AIS data from Nov 2009 - Jan 2010
 Pathfinder2 S-AIS from Nov 2009 - Jan 2010
 Map Projection: WGS84

Explanatory note:
 "Ship Density" is defined as the average number of vessels within
 a grid cell, based on 10 global S-AIS scenes. Each global S-AIS
 scene retains one position report per vessel within a time frame of 8 days.
