Litter on beaches

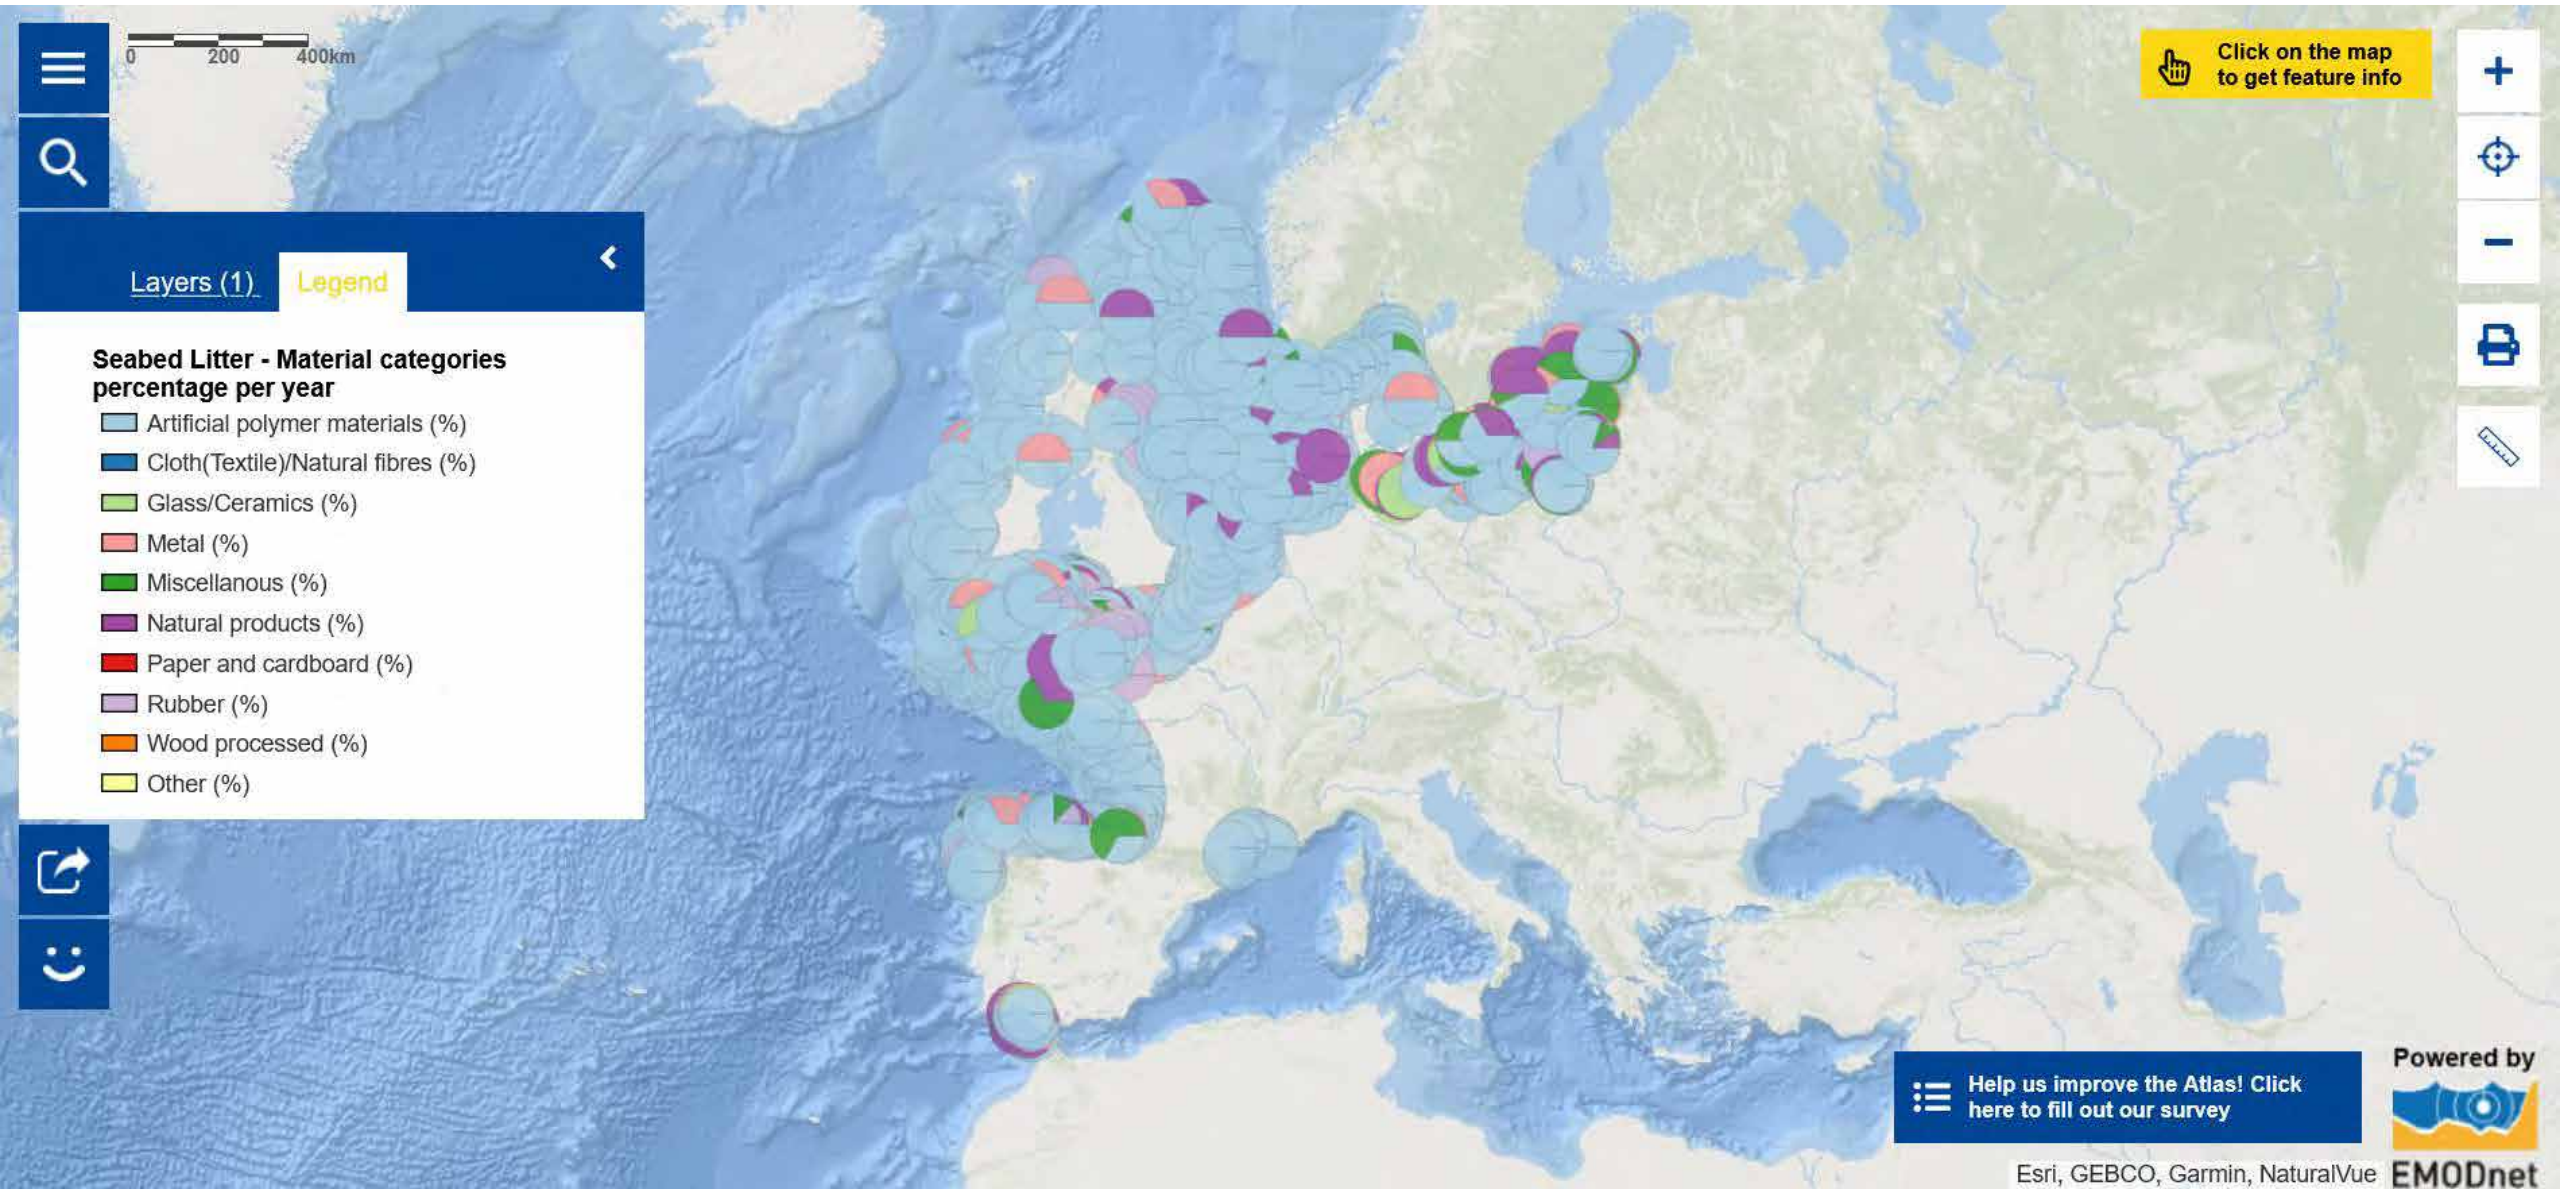

Litter on beaches

... and on the seabed

... and on the seabed

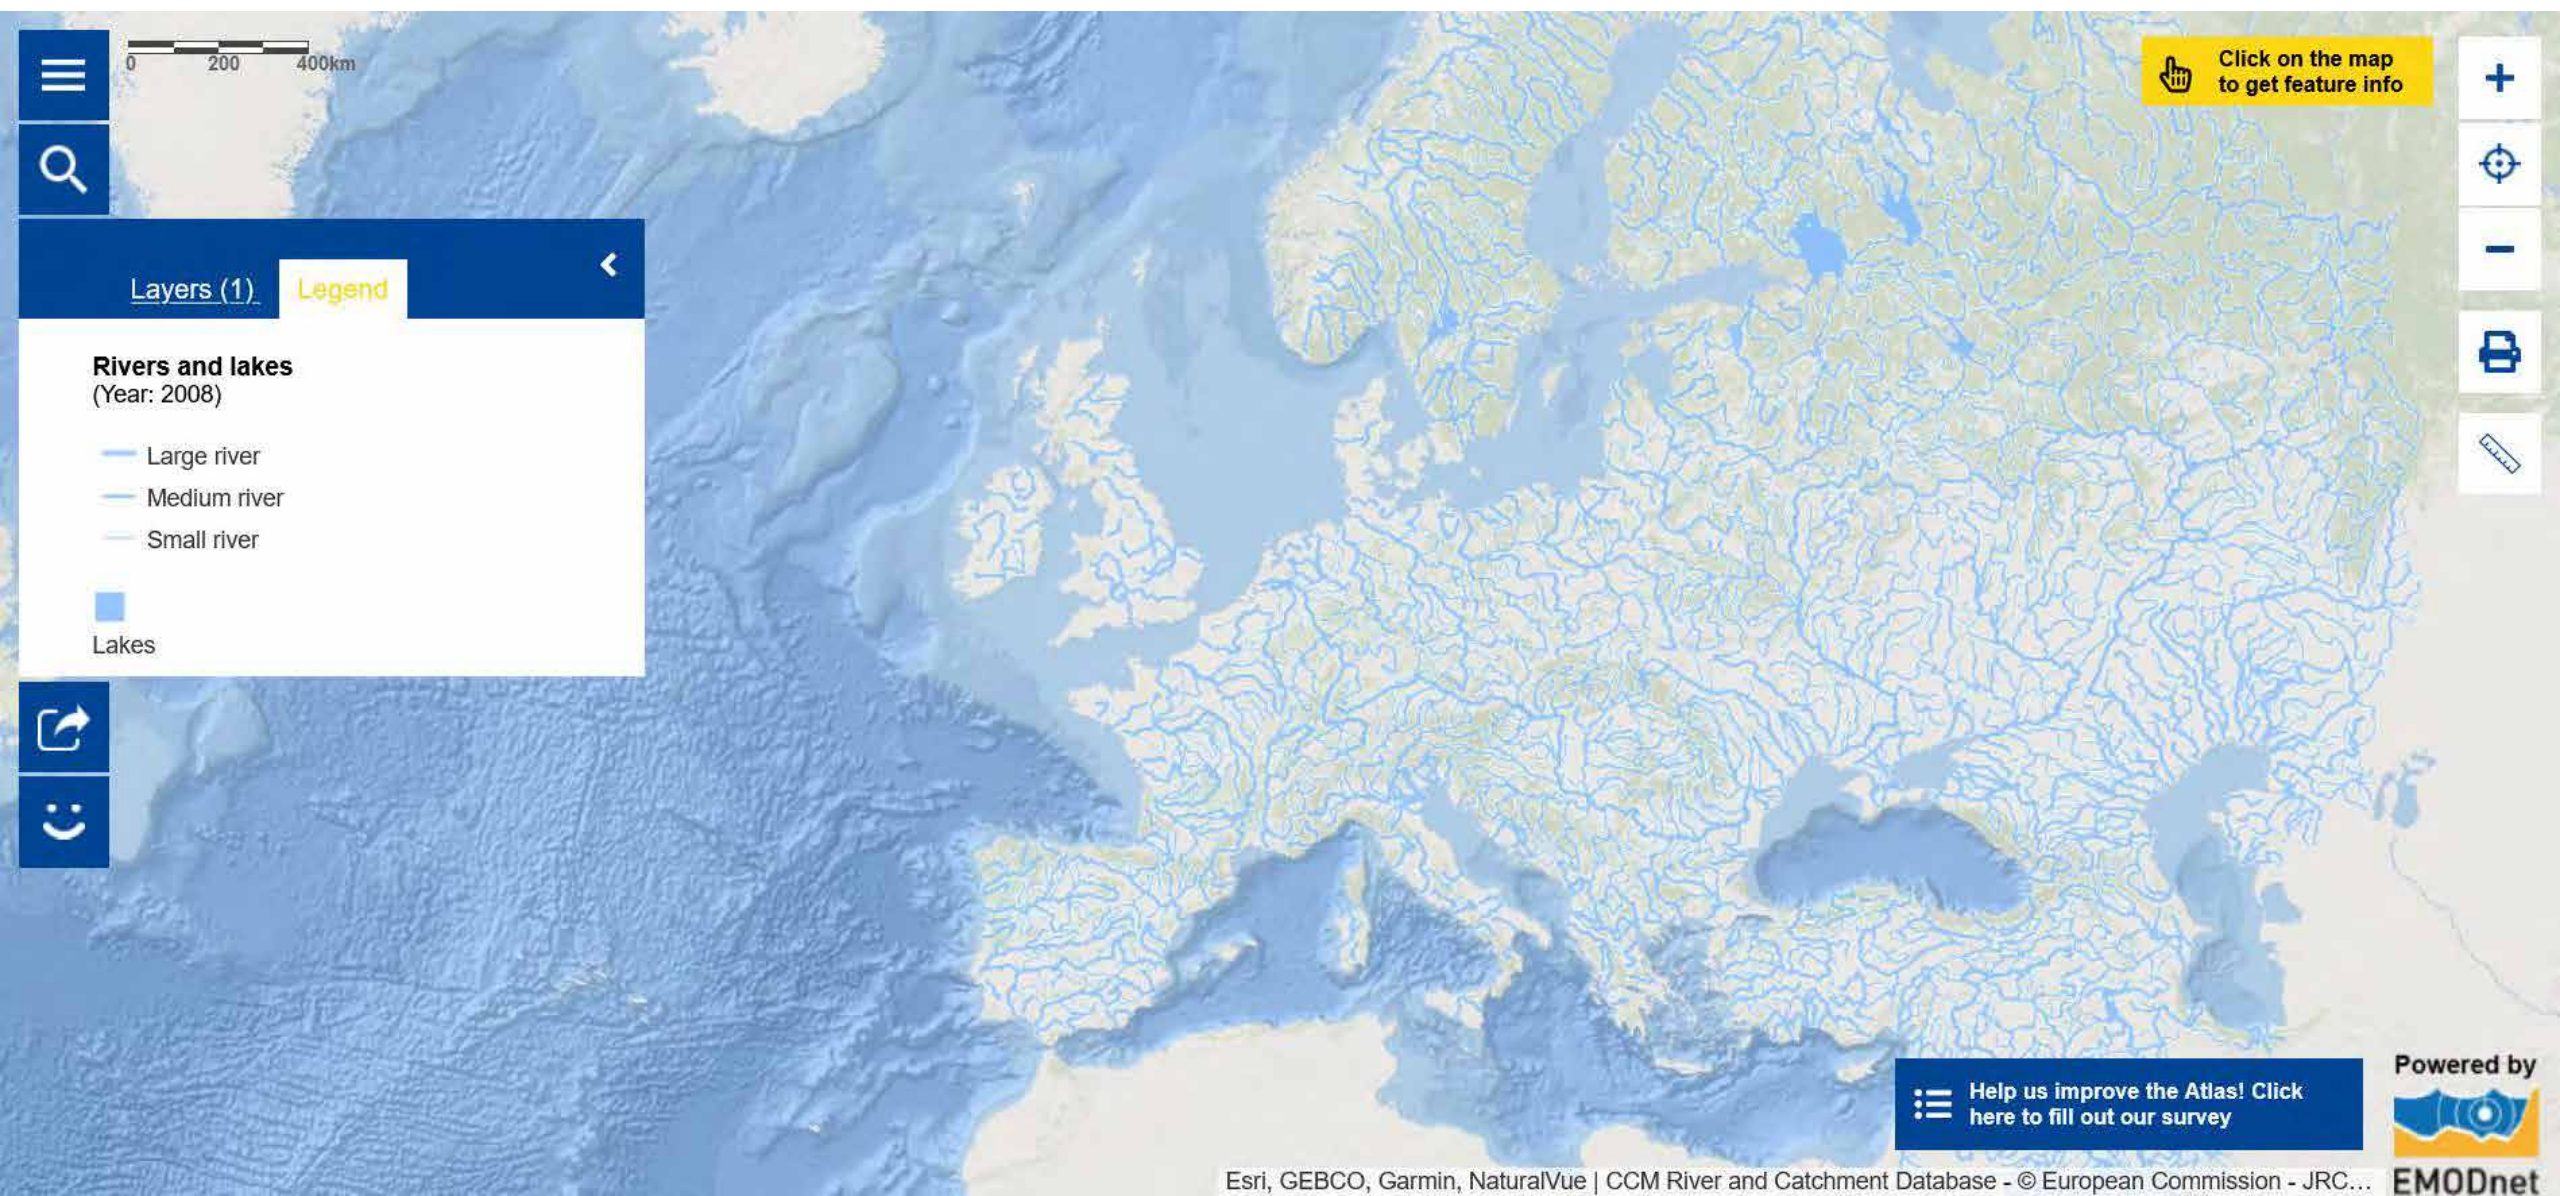

Working together: #EUBeachCleanup

The screenshot shows a web application interface for tracking beach cleanup events. The main map displays Europe with numerous markers representing cleanup events. A legend on the left identifies markers for 2018 and 2019 events. A pop-up window titled "Beach Clean Up Events (1 of 3)" is open, showing a group photo of participants holding a European Union flag. The event details are as follows:

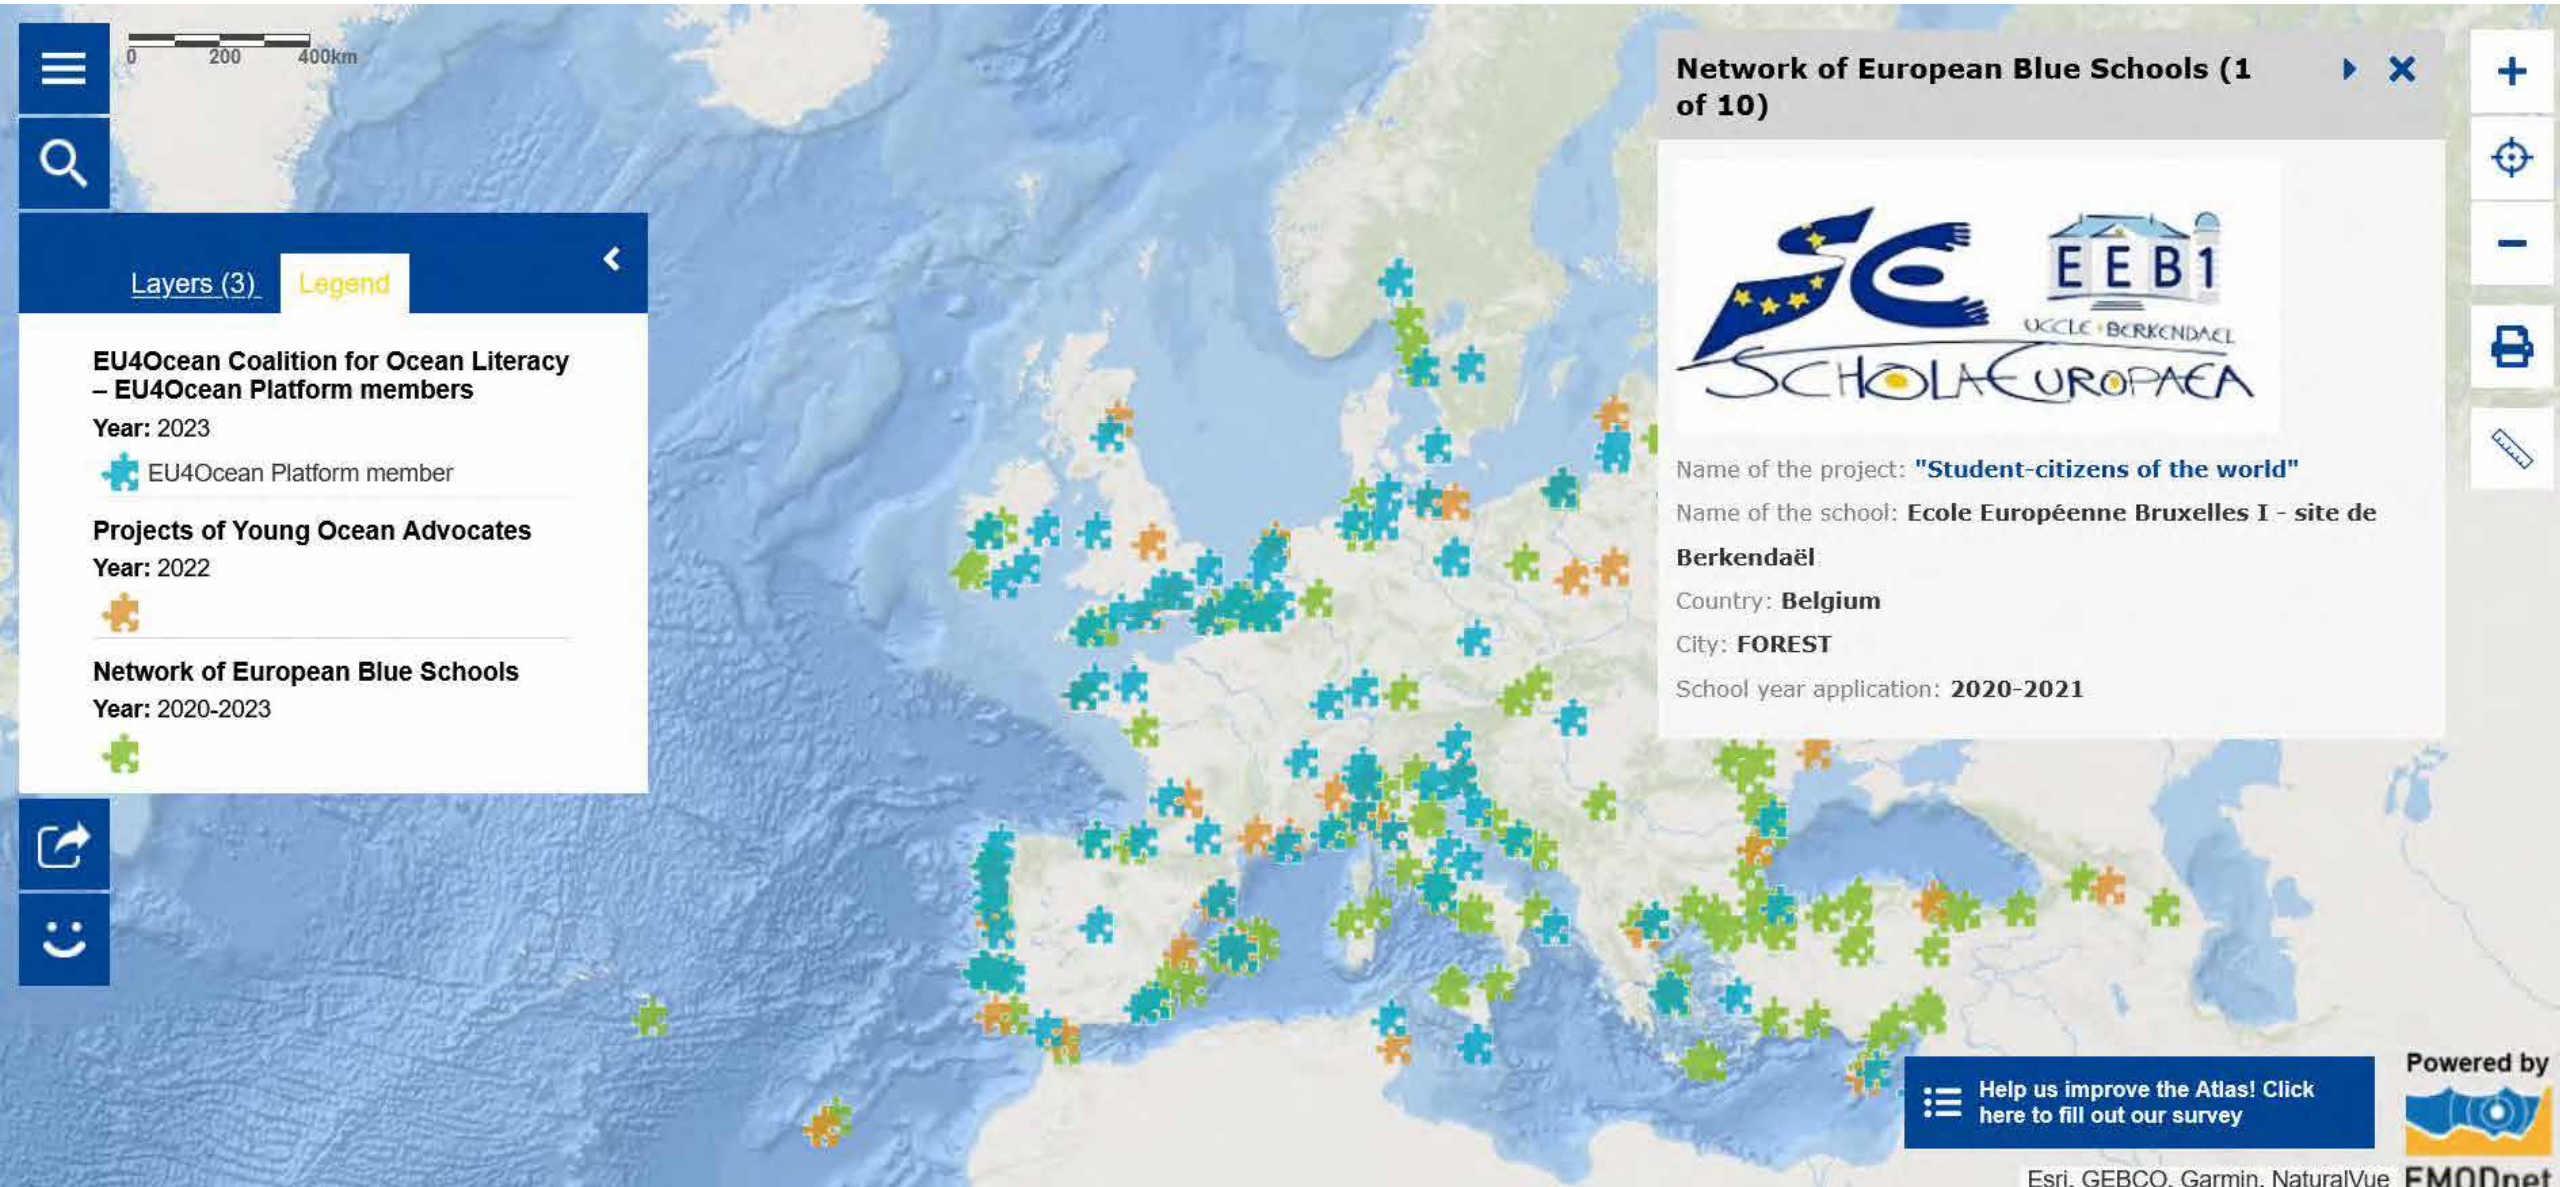

Field	Value
Country	Belgium
City or beach	Blankenberge
Date	25/03/2018
Collected waste	5000 kg

At the bottom of the application, there is a survey link: "Help us improve the Atlas! Click here to fill out our survey". The application is powered by EMODnet, with logos for Esri, GEBCO, Garmin, NaturalVue, and the European Union.

Reducing marine litter starts in the city
