

# OBSERVING AND MAPPING MARINE ECOSYSTEMS

– NEXT GENERATION TOOLS –

-> Task 6.4. Evaluation of information products for  
carbon storage (Blue Carbon), offsetting and NDC

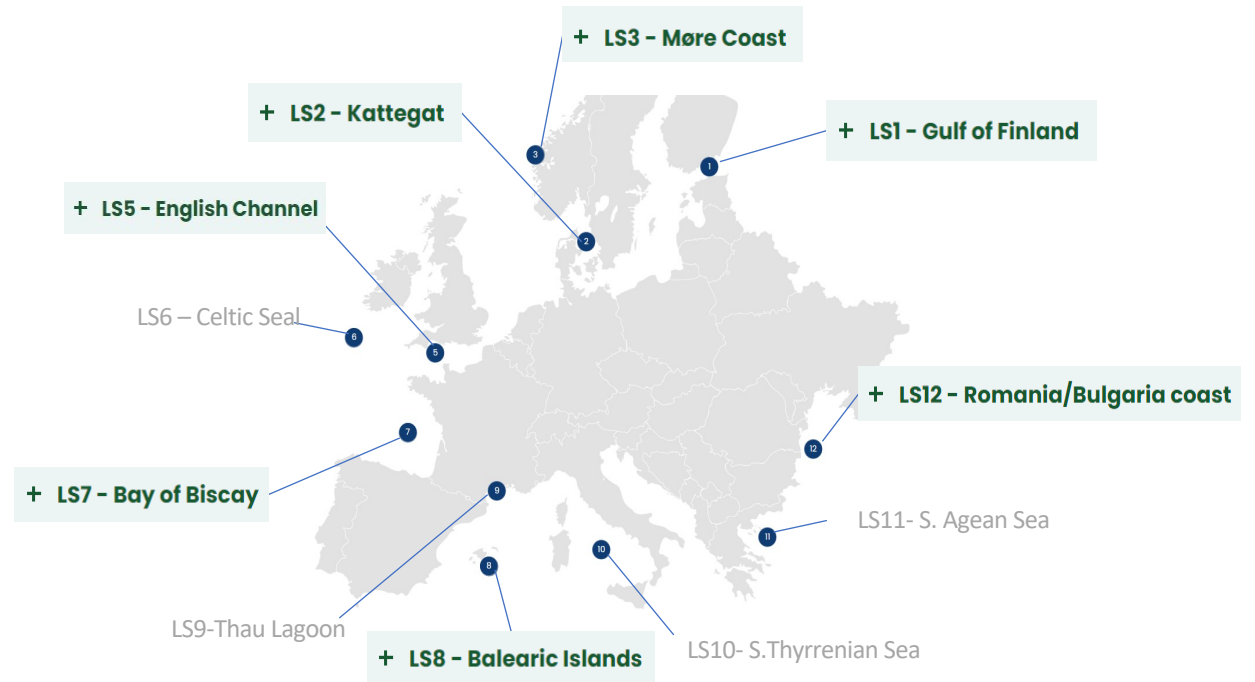

Informal Workshop on Progress in Measuring and Reporting Blue Carbon

Núria Marbà, CSIC

[nmarba@imedea.uib-csic.es](mailto:nmarba@imedea.uib-csic.es)

Information tools under development/compiled (relevant for BC assessment and policy)

- Seagrass mapping – distributions and ecological status
- Coastal vegetation mapping – upscaled from drones to satellites
- Suitability maps for seagrass restoration/repopulation
- Quantification of habitat carbon stocks and sequestration

Target habitats: Seagrass and salt marsh
