

# EMODnet Central Portal

EMODnet@EurOCEAN2014

Connecting people with data

**Bathymetry**  
Data on bathymetry (water depth), coastlines, and geographical location of underwater features: wrecks.

**Geology**  
Data on seabed substrate, sea-floor geology, coastal behaviour, geological events and probabilities, and minerals.

**Seabed Habitats**  
Data on modelled seabed habitats based on seabed substrate, energy, biological zone, and salinity.

**Chemistry**  
Data on the concentrations of chemicals (pesticides, heavy metals, antifoulants) in water, sediments and biota.

**Biology**  
Data on temporal and spatial distribution of species abundance and biomass from several taxa.

**Physics**  
Data on salinity, temperature, waves, currents, sea-level, light attenuation, and FerryBoxes.

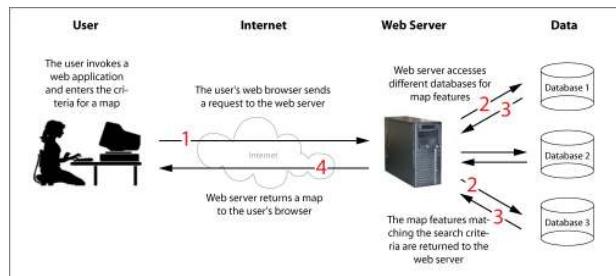

**Human Activities**  
Data on the intensity and spatial extent of human

## Central Portal

- Use Cases used as a roadmap for developing the Portal
- Generate functional requirements of portal
- Highlight added value of combining thematic data
- Scientific – or user need driven
- Implementation through working group with coordinators of the different lots and the Secretariat

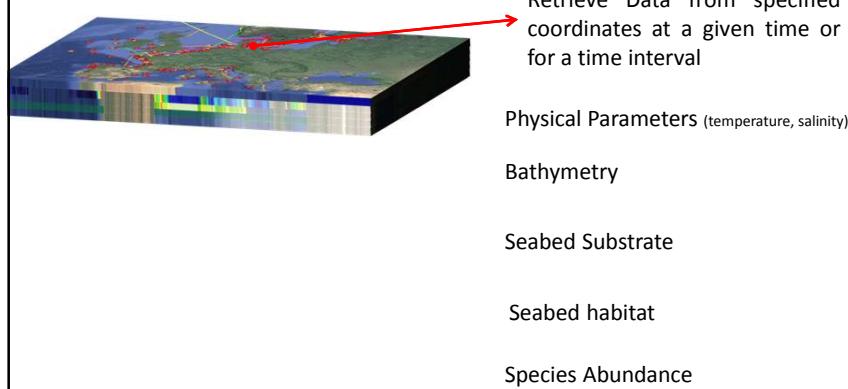

## Central Portal

- Be able to get access to the data via WFS/WMS
- Return output in different formats (list of features per coordinate point, list of points or area, Indexes etc.)

 EMODnet

## Central Portal Use case I

 EMODnet

**EMODnet Central Portal** [www.emodnet.eu/dataservices/](http://www.emodnet.eu/dataservices/)

New job Results Manual Changelog

**1. Upload your file**

Select one of the demo data files and choose from several web services, models and applications to process the data.  
To work with other data files, please [log in](#).  
If you are new to this service, please read the manual.

File [Choose File](#) No file chosen  
 Use demo file: [demofile EMODNet](#) [View demo file](#).  
 Allowed filetypes: Plain text [TXT] | Plain text [CSV] | excel [XLS] | excel [XLSX]  
 Maximum rows in file: 10000

Heading  First row contains column names  
 Column delimiter: [Tab](#) [Comma](#) [Semicolon](#)  
 Decimal symbol: [Point\(.\)](#) [Comma](#)

**2. Select Web Services**
