

I Dive At Home

Liven up your animal!

activity **Deep Sea:**

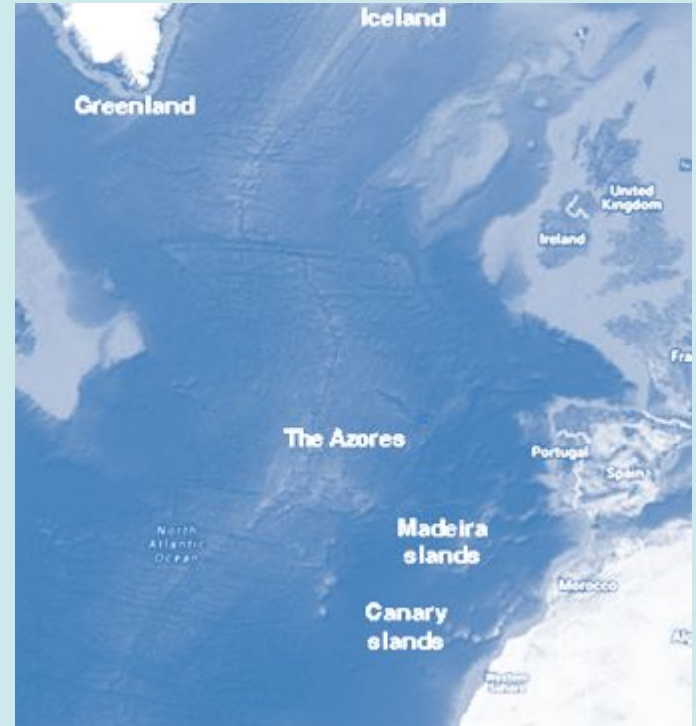

Liven up your animal!

We want you to get to know the
strange animals of the deep sea!
And more: today you are going to give
them "life"!

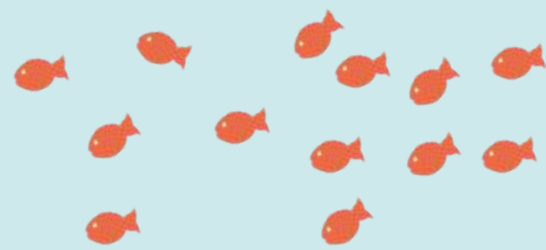

Atlas Project

ATLAS is a scientific investigation project joining Europe, Canada and United States, trying to discover more about life on the depths of the Atlantic Ocean.

ATLAS project want to give answer to the next questions:

- Wich **creatures** live on this environment?

- **What they are doing** there?

- Wich are the **effects** of an ocean in constant change?

The answers to this questions will help the scientists to advise the goverments about the mesures for the **protection of the deep sea ecosystems**, against threats, like climatic change, pollution and fisheries.

activity: **Liven up your animal**

To bring some answers to your home, we are going to increase reality.

Let's start?

You're gonna need:

- **Document Dynamic Earth printed** (in the same folder where this activity is stored)

- **Smartphone**
- **Download Spectacular app**

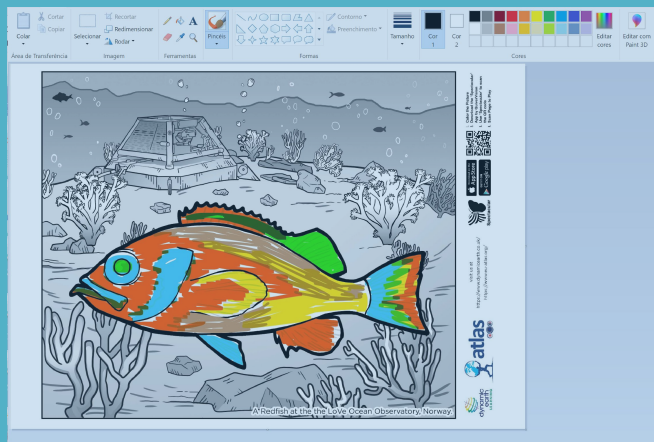

But if you don't have a printer, don't worry!

You'll also need a **computer** and **/or a tablet!**

If you have
printer:

- 1) Print one of the **Dynamic Earth** documents and let go of your imagination, painting your animal with your favourite materials.

If you don't
have a printer:

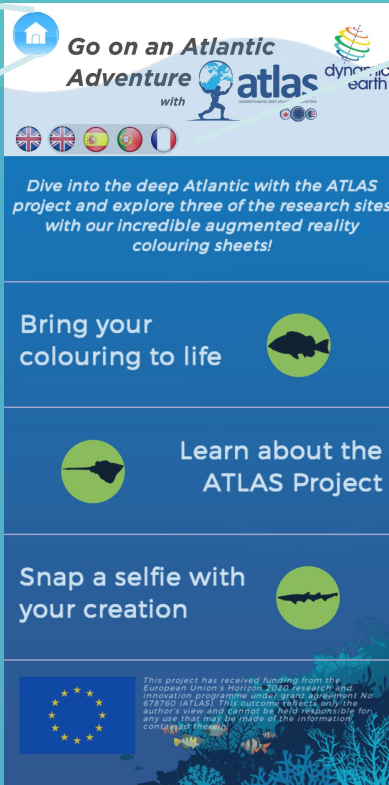

- 1) In your computer or tablet, download a **Dynamic Earth** document and open it in a drawing software program, like Paint.

Let go of your
imagination and paint
your animal.

If you have printed your animal:

2) Open the APP and follow the instructions, to liven them up! To change the language on the APP, click on the “home” button and chose the flag of your language!

If you have painted your animal on the computer:

2) Open the APP in another device (smartphone) and follow the instructions to liven up your animal! **The screen where you painted your animal works like the printed paper!**

3) Take a picture with your marine animal and share it with us!

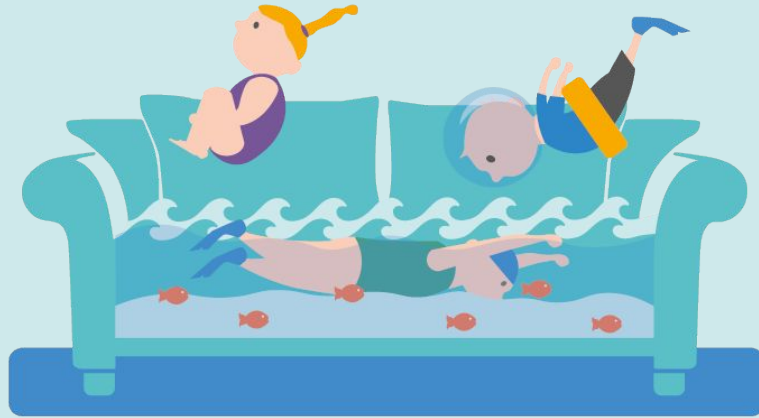

4) Learn about your animal and his habitat exploring the informations on the APP.

If you liked it, you can paint the other two animals!

We hope you had fun and enjoyed! New activities coming up soon! Stay tuned!
