

WORKSHOP

Spatial Planning and coastal risk management in ARH do Centro, IP

28 May 2010, 09:00 – 18:00, Figueira da Foz

Chair: Teresa Fidélis, President of Administração de
Região Hidrográfica do Centro, IP

Speakers:

Dr. João Ataíde, Presidente da Câmara da Figueira da Foz
Prof. Doutora Teresa Fidélis, Presidente da ARH do Centro, IP
Eng. Luis Cacho, Administração dos Portos de Aveiro e da Figueira da Foz
Eng. Jorge Bento, Comunidade Intermunicipal do Baixo Mondego
Eng. António Lucas, Comunidade Intermunicipal do Pinhal Litoral
Eng. José Ribau Esteves, Comunidade Intermunicipal da Região de Aveiro
Sr. Mendes Oliveira, Associação dos Concessionários de Apoios de Praia
Prof. Doutor Veloso Gomes
Prof. Doutora Cristina Bernardes
Prof. Doutor Pedro Proença Cunha, Universidade de Coimbra
Prof. Doutor António Campar, Universidade de Coimbra
Prof. Doutor José Ribeiro (ANPC)
Eng. António Relvão (ARH do Centro, IP)
Dra. Maria José Pitta Groz (ICNB, IP)
Eng. Pedro Gomes, PLRIA
Eng. Ana Veneza (CCDRC)
Eng. Paulo Machado (INAG)
Prof. Doutor Alfredo Marques, President of CCDRC,
Dra. Fernanda do Carmo, Secretary of State of Spatial Planning

1. Three key messages

. Public Workshop framed on the assumption that spatial planning and coastal risk management in this hydrographic region are issues of major strategic

relevance not evident on the perspectives unfold by the main users but also by the evidences brought to the fore by future scenarios of coastal evolutions and the way planning and management processes must equate and attend to.

. The debate is focused into three main approaches. One related to the views and expectations of the main users - local council, port and seashore economic activities, another related to the evidences of scientific work on coastal evolution and associated risks, and finally, another related to the balances made out of recent planning and management experiences as well as challenges to the future, having in mind likely climatic changes and associated effects in the coastal strip. It is expected a relevant contribution for the revision of coastal spatial plan now in progress.

2. Summary of the interventions

(to be added after the event)

3. Discussion: Key questions and messages from the floor, as well as responses given by the panellists.
