

The Philosophy of the I live by the Sea International Youth Photo and Film Contest

The philosophy behind the I live by the Sea Contest is to create a platform which enables exchange of information for all interested people, for whom ocean problems are important. We strive to create an international society, whose members believe in the sense to achieve the UN Sustainable Development Goals, with special emphasis on marine issues. We hope that our contest, unites international youth, who mutually learn about various aspects of marine environments, from social to natural issues.

today 
we have

We think, that the opportunity to contact people from various parts of the world is a great value itself. Therefore, taking part in the contest with a chance that his/her work will be presented in various world places, during important events dedicated to the oceans, we help to promote their own perception of the reality and their regions.

We want the participants to share this vision with us. We want all of them to feel like we are helping to change the world for better, even just a little bit, and thus the participation in this endeavor is an only "award" for all of us!
