## 1. Introduction

The Annex 3 is providing the analysis of availability indicators for all P02 characteristics by challenge.

In order to provide a visual indication of the input data availability for each P02 characteristics, a coloured table for each indicator has been produced for each Challenge. This assessment is done on the entire Mediterranean Sea metadatabase, not only for the selected input data sets chosen to make the Challenge products. The input data sources selected for each P02 characteristics in the Challenges are different and can have different availability indicators.

The eight availability indicators are classified on a basis of a color code with the following meaning:

- **Red:** urgent actions are required to provide datasets and services fitting for use – totally inadequate
- **Yellow:** limited actions are required to provide datasets and services fitting for use – partly adequate
- **Green:** actions and services are fit for use and should be maintained – fully adequate

The color code refers to selected values for each indicator, detailed in Table 3.0 below.

Name of indicator	Indicator values and meaning
AV-VI-1- Easily found	<p>“Red”: “Cited in peer reviewed paper or grey literature but no info on how to access” or “Information retrieved upon specific request to the data source”</p> <p>“Yellow”: “Use of social network, community of practices sharing information, Portals of organization where no search is organized by an engine”</p> <p>“Green”: “Use of open search engines, searching by the name of either the data provider or the characteristics” or “Search via a reference catalogue is possible”</p>
AV-VI-2-INSPIRE Catalogue service	<p>“Red”: “Data sets are not referenced in a catalogue or are referenced in a non public catalogue”</p> <p>“Yellow”: “The datasets are referenced in a public national catalogue, in an international catalogue service ”</p> <p>“Green”: “The datasets provide a full EU INSPIRE catalogue service ”</p>
AV-AC-1- Policy visibility	<p>“Red”: “There is no information at all on data policy adopted by data providers”</p> <p>“Yellow”: “There is information, but details are available only on request”</p> <p>“Green”: “There is detailed information provided to understand data policy”</p>

<b>AV-AC-2-mechanism</b>	<b>Delivery</b>	<p><b>“Red”:</b> "No information was found on data delivery mechanisms" or "Order form/invoice is requested"</p> <p><b>“Yellow”:</b> "Online downloading services "</p> <p><b>“Green”:</b> "Online discovery and downloading services" or "Online discovery + downloading + viewing services (Advanced services)"</p>
<b>AV-AC-3- Data Policy</b>		<p><b>“Red”:</b> "Not or not well documented"</p> <p><b>“Yellow”:</b> "Restricted"</p> <p><b>“Green”:</b> "Unrestricted"</p>
<b>AV-AC-4- Pricing</b>		<p><b>“Red”:</b> "Not or not well documented" or "Commercial cost charge"</p> <p><b>“Yellow”:</b> "Distribution charge" or "Collection charge" or "Free of charge for academic institutions and uses"</p> <p><b>“Green”:</b> "Open and Free, No charge"</p>
<b>AV-AC-5- Readiness</b>		<p><b>“Red”:</b> "Format not or not well documented" or "Proprietary format and not well documented " or "Not proprietary format but content not clearly specified "</p> <p><b>“Yellow”:</b> "Proprietary format but content clearly specified "</p> <p><b>“Green”:</b> "Not proprietary format and content clearly specified (eg auto-descriptive eg ODV, NetCDF CF) or at least with appropriate documentation"</p>
<b>AV-PE-1- Responsiveness</b>		<p><b>“Red”:</b> "No information is found on response time" or "More than 1 week for release"</p> <p><b>“Yellow”:</b> "Less or equal to 1 week for release"</p> <p><b>“Green”:</b> "Online downloading (i.e. a few hours or less) for release"</p>

Table A3.0 Color code and indicator values

## 2. Overall availability scores statistics

Table A3.1 lists the P02 characteristic categories and the scores across the different data sets used by the Challenges. The colour inserted is the one representing the largest number of data sets, the most frequent colour. If two colours have the same number of input data sets then the “best” colour is chosen, i.e., the more “adequate” one. This is because if equal number of data sets are indicated with different scores, this might not be a real gap in the observing system adequacy but it could be due to communities not using available data sets.

DGMARE decided to have a “theme” classification of the P02 characteristic categories, and we have grouped the P02 in tables A3.1 and A3.2 following this subdivision.

**Table A3.1 Overall assessment of the Availability indicators by P02 Characteristics. The score represents the most frequent colour among the different scores given by the different Challenges to different data sets. If two colours have the same number of input data sets then the “best” colour is chosen, i.e., the more “adequate” one.**

P02 characteristics category	# of data sets	Easily found	INSPIRE catalog service	Visibility of Data policy	Data delivery	Data policy	Pricing	Readiness	Responsiveness
<i>Bathymetry</i>									
Bathymetry and Elevation	5	Green	Yellow	Green	Green	Green	Green	Green	Green
Terrestrial mapping	1	Green	Yellow	Green	Green	Green	Green	Green	Green

### 3. Availability scores by Challenges

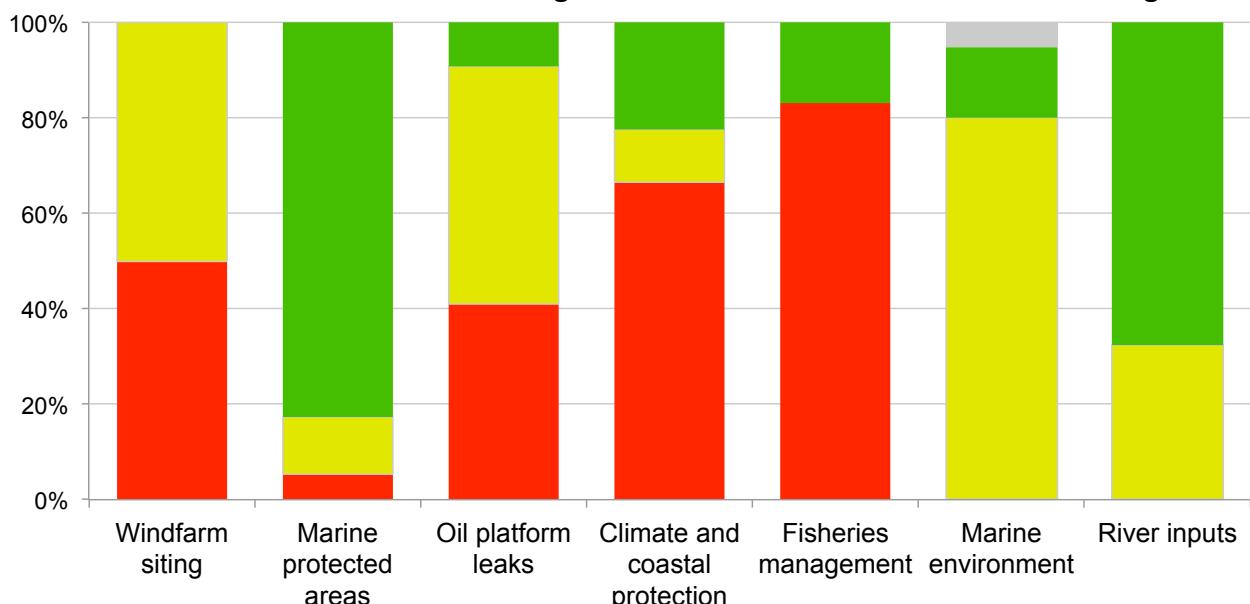

Availability indicator scores as a function of Challenges for all input data sets are shown in the 8 histograms below in terms of percentage of input data sets with respect to total data sets per Challenge.

Colors indicated the red, yellow and green scores. Grey means “unknown” score for the specific dataset.

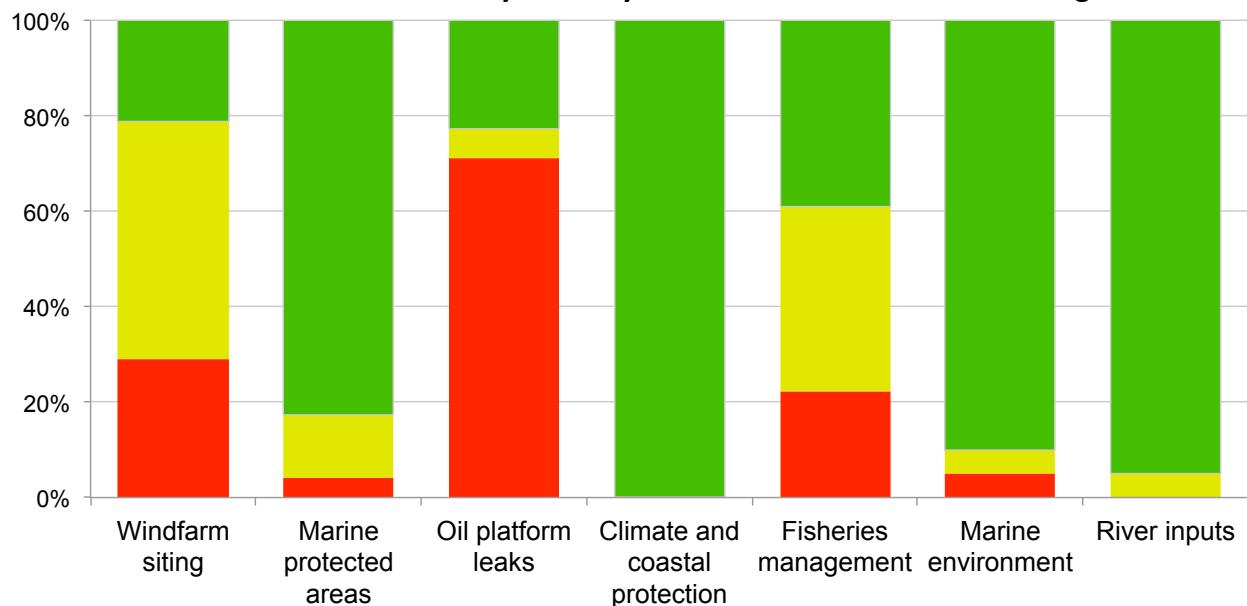

**Table A3.3: AV-VI-1 Easily Found indicator scores for each Challenge**

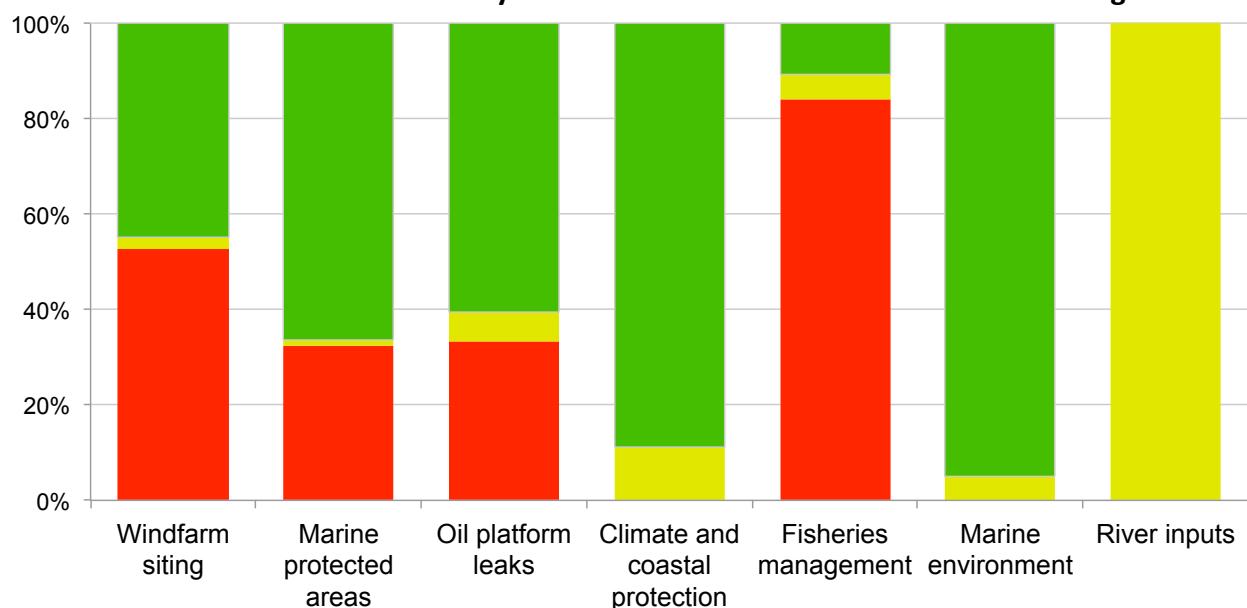

**Table A3.4: AV-VI-2 INSPIRE Catalogue Service indicator scores for each Challenge**

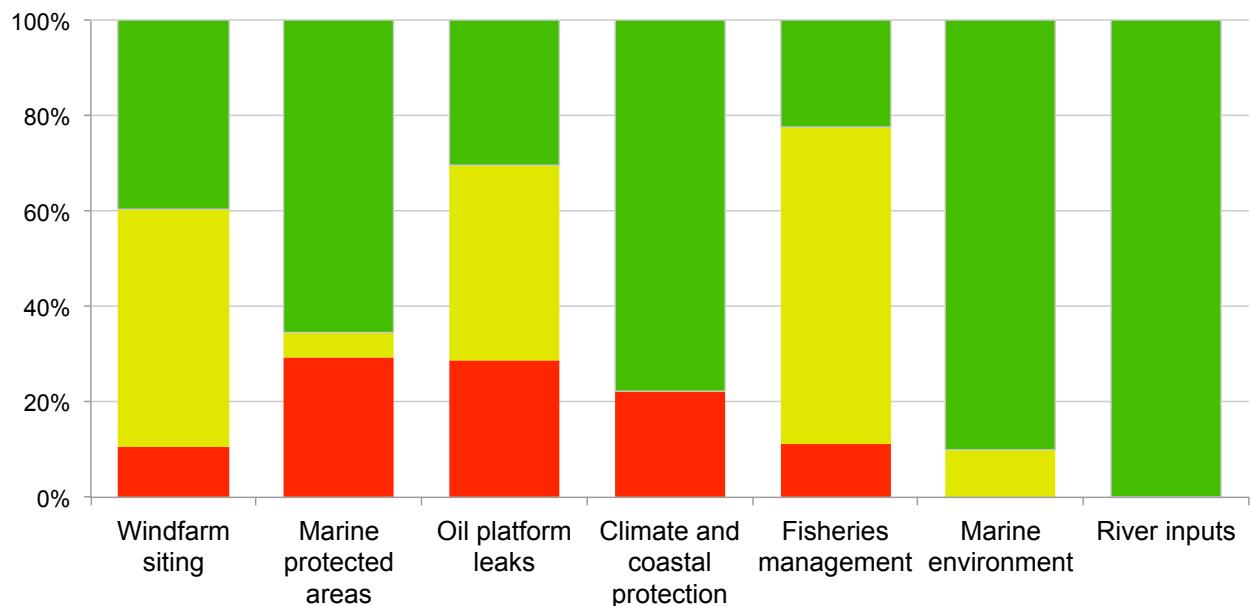

**Table A3.5: AV-AC-1 Policy Visibility indicator scores for each Challenge**

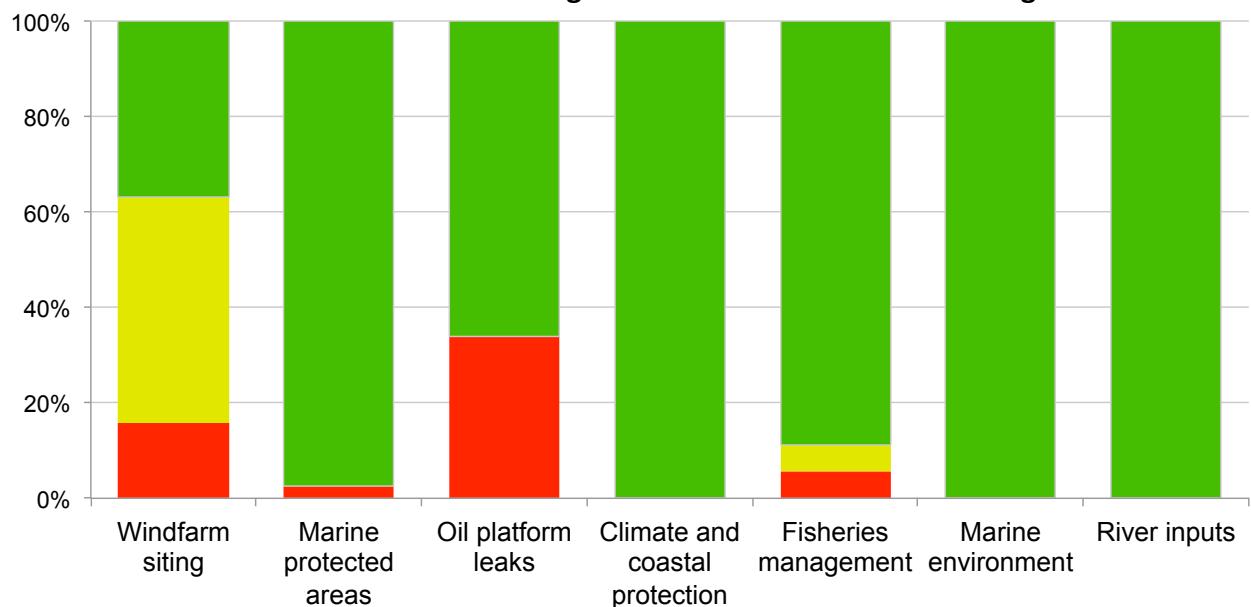

**Table A3.6: AV-AC-2 Delivery Mechanism indicator scores for each Challenge**

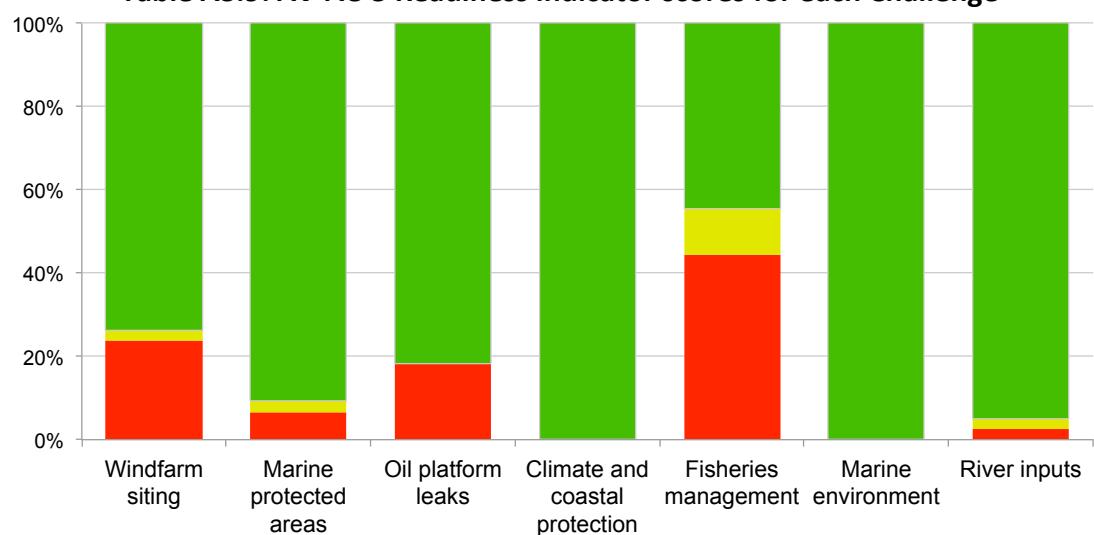

**Table A3.7: AV-AC-3 Data Policy indicator scores for each Challenge**

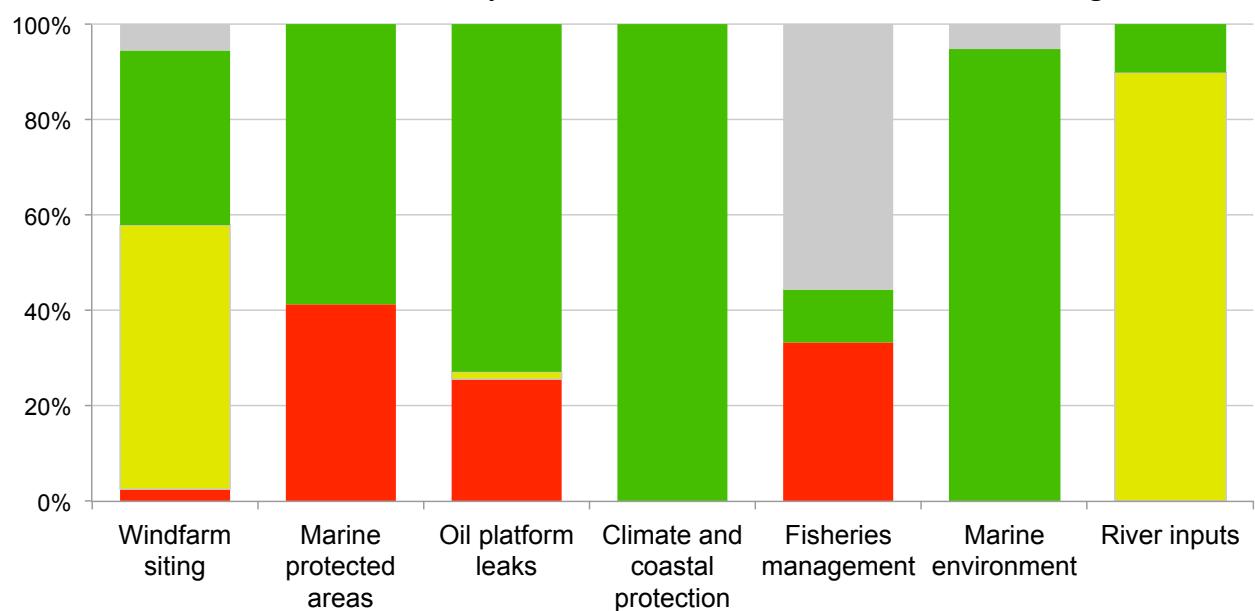

**Table A3.8: AV-AC-4 Pricing indicator scores for each Challenge**

**Table A3.9: AV-AC-5 Readiness indicator scores for each Challenge**

### 3. Detailed description of availability scores by Challenge

All input data sets are listed below, they are divided by Challenge, and provided with availability indicator scores.

#### Challenge 1: Wind farm siting

The table below presents availability indicators for all data sets related to Ch1 Wind farm siting (38 data sets, 27 P02 characteristics categories, see tables 7.1 and A1.1).

Category - P02 - Category of characteristics	Availability / Visibility / Easily found	Availability / Visibility / EU catalogue service	Availability / Accessibility / Data delivery mechanisms	Availability / Accessibility / Visibility of data policy	Availability / Accessibility / Data Policy	Availability / Accessibility / Pricing	Availability / Accessibility / Readiness	Availability / Performance / Responsiveness
Air pressure	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
Air temperature	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release

Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content  Less or equal to 1 week for release
Bathymetry and Elevation	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>17</sup> )	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content  Online downloading (i.e. a few hours or less) for release
Bird behaviour	Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Unrestricted  Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content  Online downloading (i.e. a few hours or less) for release
Bird counts	Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Unrestricted  Open and Free. No charge	Format not or not well documented  Online downloading (i.e. a few hours or less) for release
Bird counts	Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Unrestricted  Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content  Online downloading (i.e. a few hours or less) for release

Bird reproduction	Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Format not or not well documented
	Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Format not or not well documented
Fauna abundance per unit area of the bed	Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Format not or not well documented
Fauna abundance per unit area of the bed	Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Format not or not well documented
Fauna abundance per unit area of the bed	Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Format not or not well documented
Fish abundance in water bodies	Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Format not or not well documented

Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
Fish abundance in water bodies	Information retrieved upon specific request to the data source	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
Fish reproduction	Information retrieved upon specific request to the data source	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
Habitat characterisation	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>TC</sup> )	Online discovery and downloading services	There is information, but details are available only on request	Unrestricted	Not or not well documented	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
Habitat characterisation	Information retrieved upon specific request to the data source	Online discovery and downloading services	There is information, but details are available only on request	Restricted	Not or not well documented	Format not proprietary but content not clearly specified
Horizontal velocity of the water column (currents)	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content

Horizontal velocity of the water column (currents)	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
	Cited in peer reviewed paper or grey literature but no info on how to access	Private or limited access service	Manual process: Order form/invoice is requested	There is no information at all on data policy adopted by data providers	Restricted	Not or not well documented	Format not or not well documented
Man-made structures	Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Restricted	Commercial charge	Format proprietary but content clearly specified
Marine archaeology	Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Manual process: Order form/invoice is requested	There is no information at all on data policy adopted by data providers	Accessible under moratorium	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
Marine environment leisure usage	Cited in peer reviewed paper or grey literature but no info on how to access	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
Salinity of the water column	Information retrieved upon specific request to the data source						Less or equal to 1 week for release

Sea level	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
Sedimentary structure	Search via reference catalogue (e.g. MyOcean, GEOSS GeoportalITC*)	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Format not proprietary but content not clearly specified	Less or equal to 1 week for release
Spectral wave data parameters	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is detailed information provided to understand data policy	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
Temperature of the water column	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
Transport activity	Search via reference catalogue (e.g. MyOcean, GEOSS GeoportalITC*)	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Format not proprietary but content not clearly specified	Online downloading (i.e. a few hours or less) for release

Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>17</sup> )	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary but content not clearly specified Online downloading (i.e. a few hours or less) for release
Use of open search engines, searching by name either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Commercial charge	Format not proprietary but content not clearly specified Less or equal to 1 week for release
Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content Less or equal to 1 week for release
Wave direction	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content Less or equal to 1 week for release
Wave height and period statistics	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content Less or equal to 1 week for release

Wave height and period statistics	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
Wind speed and direction	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release

Wind strength and direction	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Distribution charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
	Non-classified (Air density)	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Distribution charge

Uncertainties are evident for the Bird Behaviour, Bird counts, Bird Reproduction, Fauna Abundance, Fish Reproduction for which there is an advanced service but no information on data policy. The advanced services should indicate that data are viewing and downloading from portals and then policy visibility should be clear. The same uncertainty is for the Habitat characteristics, having advanced services or discovery and download services, but unclear information on data policy.

The uncertainty is probably rising from the fact that the information is found in portals providing metadata, and an indirect access to data, in some cases password protected.

## Challenge 2: Marine Protected Areas

The table below presents availability indicators for all data sets related to Ch2 Marine Protected Areas (75 data sets, 19 P02 characteristics categories, see tables 7.1 and A1.1).

Category - P02 - Category of characteristics	Availability / Visibility / Easily found	Availability / EU catalogue service	Availability / Accessibility / Data delivery mechanisms	Availability / Accessibility / Visibility of data policy	Availability / Accessibility / Data Policy	Availability / Accessibility / Pricing	Availability / Accessibility / Readiness	Availability / Performance / Responsiveness
Administrative units	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Administrative units	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>13a</sup> )	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>13a</sup> )	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release

Administrative units	Search via catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Search via catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Administrative units	Search via catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	The datasets are provided through an EU Inspire catalogue service (OGC)	There is no information at all on data policy adopted by data providers	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
	Search via catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	The datasets are provided through an EU Inspire catalogue service (OGC)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Administrative units	Search via catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	Restricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Search via catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	The datasets are provided through an EU Inspire catalogue service (OGC)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Administrative units	Search via catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	The datasets are provided through an EU Inspire catalogue service (OGC)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release

Administrative units	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is detailed information provided to understand data policy	Restricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
Administrative units	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is detailed information provided to understand data policy	Restricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Administrative units	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Restricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time

Administrative units	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is no information at all on data policy adopted by data providers	Unrestricted	Open and Free. No charge	Format not proprietary but content not clearly specified	No information is found on response time
Administrative units	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is detailed information provided to understand data policy	Restricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is detailed information provided to understand data policy	Restricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
Administrative units	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Unrestricted	Open and Free. No charge	Format not proprietary but content not clearly specified	No information is found on response time

Administrative units	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is information, but details are available only on request	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
Administrative units	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	Manual process: Order form/invoice is requested	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
Administrative units	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time

Bathymetry and Elevation	Search via catalogue (e.g. MyOcean, GEOSS Geoportal) <sup>a)</sup>	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Search via catalogue (e.g. MyOcean, GEOSS Geoportal) <sup>a)</sup>	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Bird behaviour	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Restricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is detailed information provided to understand data policy	Restricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
Bird behaviour	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release

Cetacean abundance	Search via catalogue (e.g. MyOcean, GEOSS Geoportal) <sup>a)</sup>	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Search via catalogue (e.g. MyOcean, GEOSS Geoportal) <sup>a)</sup>	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Cetacean behaviour	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal) <sup>a)</sup>	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Cetacean behaviour	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Restricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
Cetacean behaviour	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	Online download services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not or not well documented	No information is found on response time
Chlorophyll pigment concentrations in water bodies	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal) <sup>a)</sup>	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release

Chlorophyll pigment concentrations in water bodies	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>TC<sup>a</sup></sup> )	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Chlorophyll pigment concentrations in water bodies	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>TC<sup>a</sup></sup> )	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Coastal geomorphology	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>TC<sup>a</sup></sup> )	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Depositional environment	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>TC<sup>a</sup></sup> )	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Disolved oxygen parameters in the water column	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>TC<sup>a</sup></sup> )	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release

Dissolved oxygen parameters in the water column	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Fauna abundance per unit area of the bed	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is detailed information provided to understand data policy	Restricted	Open and Free. No charge	No information is found on response time	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
Fish behaviour	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Habitat characterisation	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format proprietary but content clearly specified	Online downloading (i.e. a few hours or less) for release

Habitat extent	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Habitat extent	Use of open search engines, searching by name either the data provider or the characteristics	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	Manual process: Order form/invoice is requested	Restricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	Restricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
Habitat extent	Use of open search engines, searching by name either the data provider or the characteristics	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	Manual process: Order form/invoice is requested	Restricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Ca])	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	Restricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time

Habitat extent	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is information, but details are available only on request	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
Habitat extent	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is detailed information provided to understand data policy	Unrestricted	Format proprietary but content clearly specified	No information is found on response time
	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is detailed information provided to understand data policy	Restricted	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time

Salinity of the water column	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>7C<sup>a</sup></sup> )	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Salinity of the water column	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>7C<sup>a</sup></sup> )	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Temperature of the water column	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>7C<sup>a</sup></sup> )	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Temperature of the water column	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal <sup>7C<sup>a</sup></sup> )	The datasets are provided through an EU Inspire catalogue service (OGC)###The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release

Wind strength and direction	Search via catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is detailed information provided to understand data policy	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
	Search via catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are provided through an EU Inspire catalogue service (OGC)	Manual process: Order form/invoice is requested	There is detailed information provided to understand data policy	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
Administrative units	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery and downloading services	There is detailed information provided to understand data policy	Accessible under moratorium	Open and Free. No charge	Format not or not well documented
	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery and downloading services	There is detailed information provided to understand data policy	Accessible under moratorium	Not or not well documented	Format not or not well documented
Administrative units	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery and downloading services	There is detailed information provided to understand data policy	Accessible under moratorium	Not or not well documented	Format not or not well documented
	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery and downloading services	There is no information at all on data policy adopted by data providers	Accessible under moratorium	Open and Free, No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content

The uncertainties here are in those characteristics having EU INSPIRE catalogue services (OGC compliant) but a order form or invoice request.

Also in this case the uncertainty is probably arising from the fact that the information is found in portals providing metadata, and then are completely ISO, OGC and INSPIRE compliant, but do not have a direct access to data, in some cases password protected.

### Challenge 3: Oil platform leaks

The table below presents availability indicators for all data sets related to Challenge 3: Oil platform leaks (66 data sets, 11 P02 characteristics categories, see tables 7.1 and A1.1).

Category - P02 - Category of characteristics	Availability / Visibility / Easily found	Availability / Visibility / EU catalogue service	Availability / Accessibility / Data delivery mechanisms	Availability / Accessibility of data policy	Availability / Accessibility / Data Policy	Availability / Accessibility / Pricing	Availability / Accessibility / Readiness	Availability / Performance / Responsiveness
Administrative units	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is no information at all on data policy adopted by data providers	Accessible under moratorium	Not or not well documented	Format not or not well documented	No information is found on response time
Administrative units	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire Catalogue service (OGC)	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Administrative units	Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Unrestricted	Open and Free. No charge	Format not proprietary but content not clearly specified	Online downloading (i.e. a few hours or less) for release

Bathymetry and Elevation	Use of open search engines, searching by name either the data provider or the characteristics	Online downloading services	There is detailed information provided to understand data policy	Accessible under moratorium	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free, No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Habitat characterisation	Use of open search engines, searching by name either the data provider or the characteristics	Manual process: Order form/invoice is requested	There is no information at all on data policy adopted by data providers	Not or not well documented	Not or not well documented	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
	Use of open search engines, searching by name either the data provider or the characteristics	Manual process: Order form/invoice is requested	There is no information at all on data policy adopted by data providers	Not or not well documented	Not or not well documented	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
Horizontal velocity of the water column (currents)	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	No information was found on data delivery mechanisms	Not or not well documented	Not or not well documented	Format not or not well documented	No information is found on response time

Horizontal velocity of the water column (currents)	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	No information was found on data delivery mechanisms	There is no information at all on data policy adopted by data providers	Not or not well documented	Not or not well documented	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Horizontal velocity of the water column (currents)	Cited in peer reviewed paper or grey literature but no info on how to access	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Accessible under moratorium	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
	Horizontal velocity of the water column (currents)	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
	Horizontal velocity of the water column (currents)	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q <sup>a</sup> ])	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. 	Use of open search engines, searching by name, either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	There is no information at all on data policy adopted by data providers	Not or not well documented	Not or not well documented	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Wave direction	Use of open search engines, searching by name, either the data provider or the characteristics	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name, either the data provider or the characteristics	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
Wave height and period statistics	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content

Wave height and period statistics	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is no information at all on data policy adopted by data providers	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Format not or not well documented	Online downloading (i.e. a few hours or less) for release
Wave height and period statistics	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Format not or not well documented	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	No information was found on data delivery mechanisms	There is no information at all on data policy adopted by data providers	Format not or not well documented	No information is found on response time
Wave height and period statistics	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Format not or not well documented	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Format not or not well documented	Online downloading (i.e. a few hours or less) for release

Wave height and period statistics	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	No information was found on data delivery mechanisms	There is no information at all on data policy adopted by data providers	Not or not well documented	Not or not well documented	Format not or not well documented	No information is found on response time
	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	No information was found on data delivery mechanisms	There is no information at all on data policy adopted by data providers	Not or not well documented	Not or not well documented	Format not or not well documented	No information is found on response time
Wave height and period statistics	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery + downloading + viewing services (Advanced services)	There is information, but details are available only on request	Accessible under moratorium	Not or not well documented	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery + downloading + viewing services (Advanced services)	There is information, but details are available only on request	Accessible under moratorium	Not or not well documented	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Wave height and period statistics	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery + downloading + viewing services (Advanced services)	There is information, but details are available only on request	Accessible under moratorium	Not or not well documented	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	No information was found on data delivery mechanisms	There is no information at all on data policy adopted by data providers	Not or not well documented	Not or not well documented	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release

Wave height and period statistics	The datasets are referenced in a public national catalogue, in an international catalogue service	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Unrestricted	Open and Free. No charge	Format not proprietary but content not clearly specified	Online downloading (i.e. a few hours or less) for release
Wind strength and direction	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Accessible under moratorium	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	Online discovery + downloading + viewing services (Advanced services)	There is information, but details are available only on request	Accessible under moratorium	Not or not well documented	Format not or not well documented	Online downloading (i.e. a few hours or less) for release
Wind strength and direction	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery + downloading + viewing services (Advanced services)	No information was found on data delivery mechanisms	Not or not well documented	Not or not well documented	Format not or not well documented	No information is found on response time
	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	No information was found on data delivery mechanisms	Not or not well documented	Not or not well documented	Format not or not well documented	No information is found on response time

Wind strength and direction	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[ <sup>a</sup> ])	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery and downloading services	There is detailed information provided to understand data policy	Accessible under moratorium	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Wind strength and direction	Use of open search engines, searching by name either the data provider or the characteristics	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Accessible under moratorium	Not or not well documented	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
Wind strength and direction	Wind strength and direction	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Not or not well documented	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Wind strength and direction	Use of open search engines, searching by name either the data provider or the characteristics	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Accessible under moratorium	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release

Wind strength and direction	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Accessible under moratorium	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
-----------------------------	---	---	---	---	-----------------------------	--------------------------	--	---

In this challenge a lot of data sources are providing physical nowcast and forecast data especially a sub-regional level. However, most of them are not referenced in well known catalogues (e.g. Copernicus).

#### Challenge 4: Climate and Coastal protection

The table below presents availability indicators for all data sets related to Challenge 4: Climate and coastal protection (69 data sets, 3 P02 characteristics categories, see tables 7.1 and A1.1).

Category - P02 - Category of characteristics	Availability / Visibility / Easily found	Availability / Visibility / EU catalogue service	Availability / Accessibility / Data delivery mechanisms	Availability / Accessibility of data policy	Availability / Accessibility / Data Policy	Availability / Accessibility / Pricing	Availability / Accessibility / Readiness	Availability / Performance / Responsiveness
Coastal geomorphology	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[ <sup>a</sup> ])	The datasets are referenced in a public national catalogue, in an international catalogue service	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free, No charge	Format not proprietary and content clearly specified (e.g. auto-descriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Sea level	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free, No charge	Format not proprietary and content clearly specified (e.g. auto-descriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Sea level	Use of open search engines, searching by name either the data provider or the characteristics	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online discovery and downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free, No charge	Format not proprietary and content clearly specified (e.g. auto-descriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release

Sea level	<p>Use of open search engines, searching by name either the data provider or the characteristics</p> <p>Data sets are not referenced in a catalogue or are referenced in a non public catalogue</p>	<p>Online discovery and downloading services</p> <p>There is detailed information provided to understand data policy</p>	<p>Unrestricted</p> <p>Open and Free. No charge</p>	<p>Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content</p> <p>Online downloading (i.e. a few hours or less) for release</p>
Sea level	<p>Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q<sup>a</sup>])</p>	<p>Online discovery and downloading services</p> <p>There is detailed information provided to understand data policy</p>	<p>Restricted</p> <p>Open and Free. No charge</p>	<p>Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content</p> <p>Online downloading (i.e. a few hours or less) for release</p>
Sea level	<p>Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[Q<sup>a</sup>])</p>	<p>Online discovery and downloading services</p> <p>There is detailed information provided to understand data policy</p>	<p>Restricted</p> <p>Open and Free. No charge</p>	<p>Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content</p> <p>Online downloading (i.e. a few hours or less) for release</p>
Sea level	<p>Use of open search engines, searching by name either the data provider or the characteristics</p>	<p>Online discovery and downloading services</p> <p>There is detailed information provided to understand data policy</p>	<p>Unrestricted</p> <p>Open and Free. No charge</p>	<p>Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content</p> <p>Online downloading (i.e. a few hours or less) for release</p>

Temperature of the water column	Use of open search engines, searching by name either the data provider or the characteristics	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. auto-descriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[3])	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. auto-descriptive like ODV, NetCDF CF) or at least with appropriate document describing the content

The main uncertainty in this challenge is linked to data sets that are not referenced in a public catalogue.

## Challenge 5: Fisheries management

The table below presents availability indicators for all data sets related to Ch5 Fisheries management (18 data sets, 5 P02 characteristics categories, see tables 7.1 and A1.1).

Category - P02 - Category of characteristics	Availability / Visibility / Easily found	Availability / EU catalogue service	Availability / Accessibility / Data delivery mechanisms	Availability / Accessibility of data policy	Availability / Accessibility / Data Policy	Availability / Accessibility / Pricing	Availability / Readiness	Availability / Performance / Responsiveness
Fish and shellfish catch statistics	Cited in peer reviewed paper or grey literature but no info on how to access	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process; Order form/invoice is requested	There is detailed information provided to understand data policy	Accessible under moratorium	Open and Free, No charge	Format not or not well documented	More than 1 week for release
Fish and shellfish catch statistics	Cited in peer reviewed paper or grey literature but no info on how to access	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process; Order form/invoice is requested	There is no information at all on data policy adopted by data providers	Accessible under moratorium	Open and Free, No charge	Format not or not well documented	Format not or not well documented
Fish and shellfish catch statistics	Cited in peer reviewed paper or grey literature but no info on how to access	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free, No charge	Format not or not well documented	Format not or not well documented
Fish and shellfish catch statistics	Cited in peer reviewed paper or grey literature but no info on how to access	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Online downloading services	There is no information at all on data policy adopted by data providers	Unrestricted	Open and Free, No charge	Format not or not well documented	Format not or not well documented
Fish and shellfish catch statistics	Cited in peer reviewed paper or grey literature but no info on how to access	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process; Order form/invoice is requested	There is detailed information provided to understand data policy	Accessible under moratorium	Open and Free, No charge	Format not or not well documented	Format not or not well documented

Fish and shellfish catch statistics	Cited in peer reviewed paper or grey literature but no info on how to access	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process; Order form/invoice is requested	There is detailed information provided to understand data policy	Accessible under moratorium	Open and Free, No charge	Format not or not well documented	More than 1 week for release
	Cited in peer reviewed paper or grey literature but no info on how to access	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process; Order form/invoice is requested	There is detailed information provided to understand data policy	Accessible under moratorium	Open and Free, No charge	Proprietary format and not well documented	More than 1 week for release
Fishing by-catch	Information retrieved upon specific request to the data source	The datasets are referenced in a public national catalogue, in an international catalogue service	Manual process; Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Free of charge for academic institutions and uses	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	No information is found on response time
Habitat extent	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	No information was found on data delivery mechanisms	No information at all on data policy adopted by data providers	Restricted	Not or not well documented	Format proprietary but content clearly specified	No information is found on response time
Horizontal platform movement	Cited in peer reviewed paper or grey literature but no info on how to access	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process; Order form/invoice is requested	No information at all on data policy adopted by data providers	Restricted	Distribution charge	Format not or not well documented	More than 1 week for release
Horizontal platform movement	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process; Order form/invoice is requested	There is information, but details are available only on request	Accessible under moratorium	Open and Free, No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	More than 1 week for release

Horizontal platform movement	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request
Horizontal platform movement	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request
Horizontal platform movement	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request
Horizontal platform movement	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	There is information, but details are available only on request
Horizontal platform movement	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
Horizontal platform movement	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
Horizontal platform movement	Information retrieved upon specific request to the data source	Data sets are not referenced in a catalogue or are referenced in a non public catalogue	Manual process: Order form/invoice is requested	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content

Lithology	Use of open search engines, searching by name, either the data provider or the characteristics	<p>The datasets are provided through an EU Inspire catalogue service (OGC)</p> <p>Online discovery + downloading + viewing services (Advanced services)</p> <p>There is detailed information provided to understand data policy</p>	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Lithology	Use of open search engines, searching by name, either the data provider or the characteristics	<p>The datasets are provided through an EU Inspire catalogue service (OGC)</p> <p>Online discovery + downloading + viewing services (Advanced services)</p> <p>There is detailed information provided to understand data policy</p>	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release

This challenge is the most critical in terms of access to data. Most of them are under 'moratorium' conditions, and a manual access is requested after order.

## Challenge 6: Marine environment

The table below presents availability indicators for all data sets related to Ch6 Marine environment (20 data sets, 6 P02 characteristics categories, see tables 7.1 and A1.1).

Category - P02 - Category of characteristics	Availability / Visibility / Easily found	Availability / EU catalogue service	Availability / Accessibility / Data delivery mechanisms	Availability / Accessibility of data policy	Availability / Accessibility / Data Policy	Availability / Accessibility / Pricing	Availability / Accessibility / Readiness	Availability / Performance / Responsiveness
Chlorophyll pigment concentrations in water bodies	Search via reference catalogue (e.g. MyOcean, GEOSS, Geoportal <sup>Q<sup>a</sup></sup> )	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Accessible under moratorium	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Dissolved oxygen parameters in the water column	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Dissolved oxygen parameters in the water column	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release

Dissolved oxygen parameters in the water column	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Dissolved oxygen parameters in the water column	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
Nitrate concentration parameters in the water column	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
Nitrate concentration parameters in the water column	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content

Nitrate concentration parameters in the water column	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	Online discovery + downloading + viewing services (Advanced services)	There is no information at all on data policy adopted by data providers	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Nitrate concentration parameters in the water column	Use of open search engines, searching by name either the data provider or the characteristics	Online discovery + downloading + viewing services (Advanced services)	Online download services	Accessible under moratorium	Free of charge for academic institutions and uses	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are provided through an EU Inspire catalogue service (OGC)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Phosphate concentration parameters in the water column	Use of open search engines, searching by name either the data provider or the characteristics	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release

Phosphate concentration parameters in the water column	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Phosphate concentration parameters in the water column	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
Salinity of the water column	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
	Use of open search engines, searching by name either the data provider or the characteristics	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release

------------------------------	--	--	---	---	---

Temperature of the water column	Use of open search engines, searching by name either the data provider or the characteristics	The datasets are referenced in a public national catalogue, in an international catalogue service	Online discovery + downloading + viewing services (Advanced services)	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Online downloading (i.e. a few hours or less) for release
---------------------------------	---	---	---	--	--------------	--------------------------	--	---

The uncertainty here is only on nitrate concentration parameters in the water column for which there is an advanced service but no information on data policy by data providers. This is an information that is not directly provided in many portals.

## Challenge 7: River inputs

The table below presents availability indicators for all data sets related to Ch6 River inputs (40 data sets, 7 P02 characteristics categories, see tables 7.1 and A1.1).

Category - P02 - Category of characteristics	Availability / Visibility / Easily found	Availability / Visibility / EU catalogue service	Availability / Accessibility / Data delivery mechanisms	Availability / Accessibility / Visibility of data policy	Availability / Accessibility / Data Policy	Availability / Accessibility / Pricing	Availability / Readiness	Availability / Performance / Responsiveness
Concentration of suspended particulate material in the water column	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[ <sup>C<sup>a</sup></sup> ])	The datasets are provided through an EU Inspire catalogue service (OGC)	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
Concentration of suspended particulate material in the water column	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[ <sup>C<sup>a</sup></sup> ])	The datasets are provided through an EU Inspire catalogue service (OGC)	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
Concentration of suspended particulate material in the water column	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[ <sup>C<sup>a</sup></sup> ])	The datasets are provided through an EU Inspire catalogue service (OGC)	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release

Concentration of suspended particulate material in the water column	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[ <sup>a</sup> ])	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
	Concentration of suspended particulate material in the water column	Search via reference catalogue (e.g. MyOcean, GEOSS Geoportal[ <sup>a</sup> ])	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content
Concentration of suspended particulate material in the water column	Use of open search engines, searching by name either the data provider or the characteristics	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
Concentration of suspended particulate material in the water column	Concentration of suspended particulate material in the water column	Use of open search engines, searching by name either the data provider or the characteristics	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content

Concentration of suspended particulate material in the water column	The datasets are referenced in a public national catalogue, in an international catalogue service	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release
	Use of open search engines, searching by name either the data provider or the characteristics	Online downloading services	There is detailed information provided to understand data policy	Unrestricted	Open and Free. No charge	Format not proprietary and content clearly specified (e.g. autodescriptive like ODV, NetCDF CF) or at least with appropriate document describing the content	Less or equal to 1 week for release

The uncertainties here are related to a low responsiveness, and a lack of online discovery and viewing services.
