Project Progress: Overview of Deliverables and Milestones (to do/pending/done) (2')

- Phase IV ended on 2023-04-19
 - All deliverables completed/work in progress
 - Paper in progress 'Realising the potential of interoperable data products to improve the future outlook for marine biodiversity: lessons from the European Marine Data and Observation Network'
- Phase V started on 2023-05-10
 - No progress report on deliverables at this point

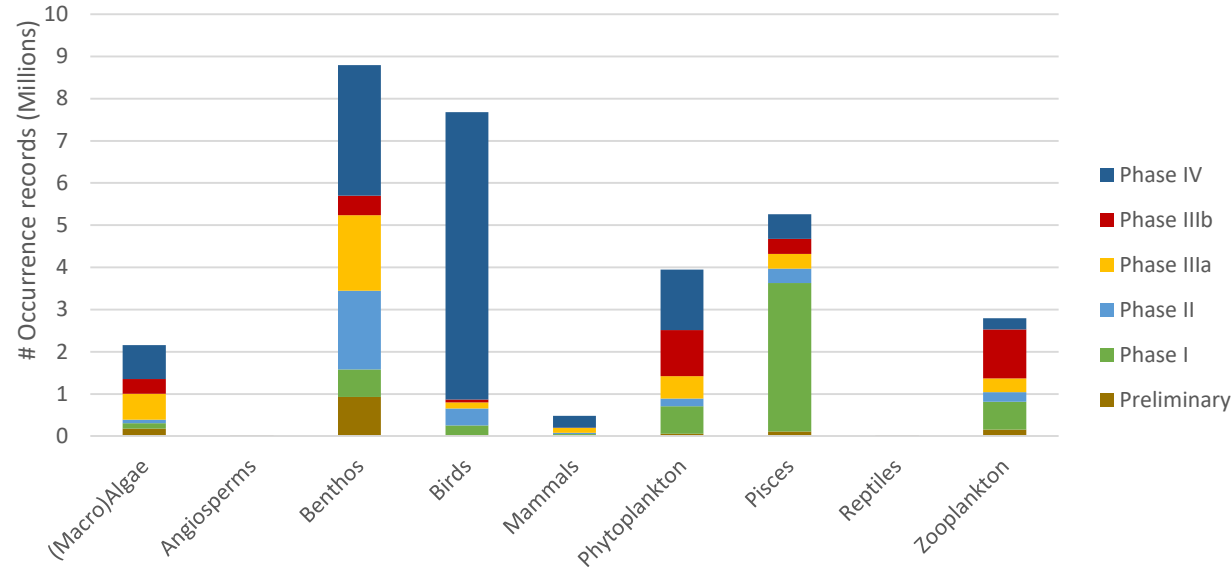

Progress on data and geographic coverage (2')

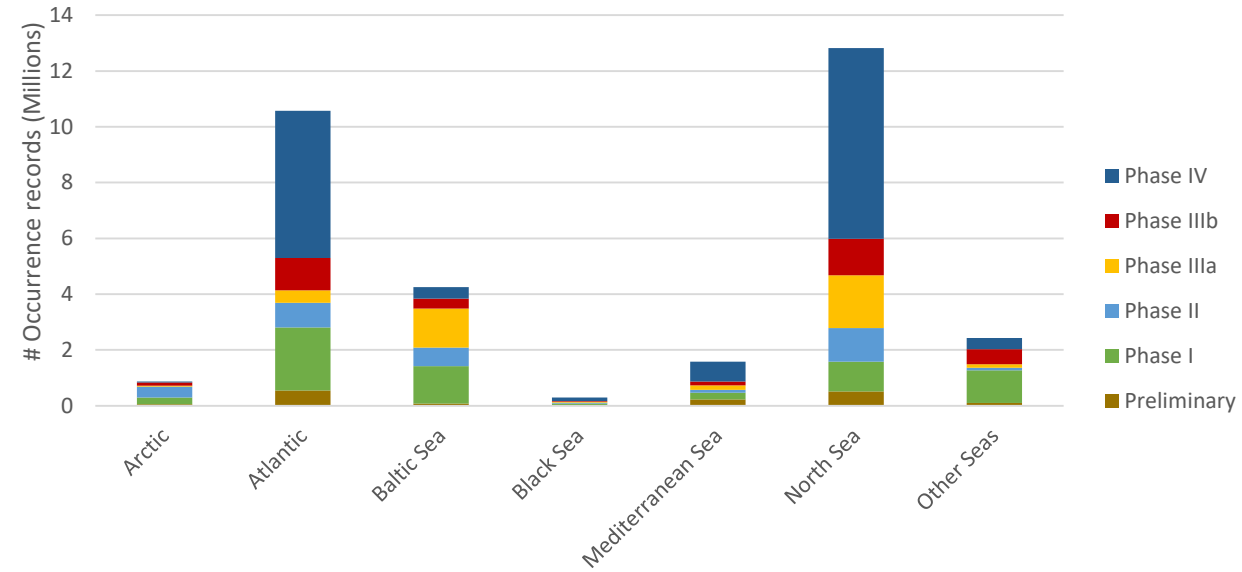

- Available data: > 35 M occurrence records, > 92 M extended measurements or facts
- Available products: 38 -> 6 new products published

Progress on data and geographic coverage (2')

Data increase per sub-theme/per Phase

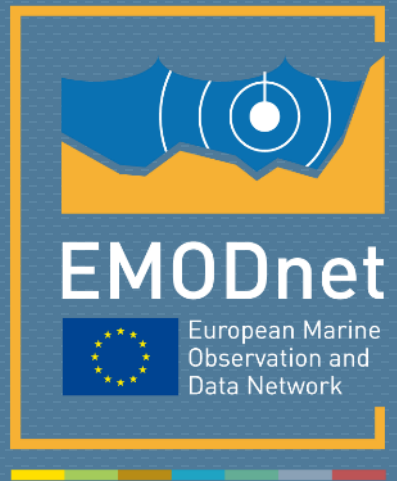

Data increase per region/per Phase

- Data still missing: (Macro)Algae, Angiosperms, Birds, Mammals, Reptiles
- Major gaps: Arctic Sea, Black Sea, Mediterranean Sea (especially southern part)
- Constraints in accessing data: providers not keen on publishing data before articles are published, data restrictions, “hidden” data, different formats, ...

Priority actions for next six months (2')

- Update CP static content
- Data publication
- Organisation of workshops (citizen science data digitisation, data training workshop)
- Elaboration of engagement plan for each RSC
- Work towards genomics data infrastructure
