Remarks:

(1) – the data provided by ESTAT for this variable are also available in combination NACE 2 digits and NUTS 2 level.

The data provided by ESTAT are mostly available only on the NUTS 0 level. Only in some cases there is a higher geographical resolution available – see remark (1).

The Statistik Austria can deliver data for section C – K on the NUTS 3 level and NACE 4 –digits level. The preparation of the data would cost ca. 5.000,00 EUR and most (ap. 70% - 80%) of them would be marked as confidential. However the Statistik Austria publishes every year data for section C – F on the NACE 4 digits for the NUTS 2 units. The approximate cost of the publications is about 100,00 EUR.

Remarks:

(1) – the data provided by ESTAT for this variable are also available in combination NACE 2 digits and NUTS 2 level.

The data provided by ESTAT are mostly available only on the NUTS 0 level. Only in some cases there is a higher geographical resolution available – see remark (1).

The Czech Statistical Office provided some additional data for some NACE 3 digits codes (see the table above). The data are available on the NUTS 0 level only.

Date of joint meeting at Statistics Denmark in Copenhagen: 12th June 2008.

Data availability:

Geographical resolution: Most of the data are only available for NUTS1 (Denmark total)
No detailed maritime data are available for NUTS3. The question of regional availability has been discussed for several times with DST.

The NUTS structure in Denmark has been changed. With the beginning of 2007 a new NUTS structure has been introduced (DK1 Denmark, DK2 with 5 regions, DK3 with 11 regions). For almost all sectors data are only available on the basis of the old NUTS structure.

Time: 2000-2007

Remarks:

- For almost all sectors maritime data are only available on the basis of national currency and the old NUTS (16 regions) structure. For the Industrial Annual Statistics DST is also able to split the data for 2000-2006 at the new NUTS level. But this task will require a lot of time.
- For most of the maritime sectors maritime data are only available for NUTS1 (Denmark total).
- As most important parts in the General Economic Statistics of Statbank with maritime data could be identified:

General Enterprise Statistics

- GF 2 (111 Industry groups, partly only for the 2-or 3-digit NACE and with some data up to the 6-digit NACE code, but only on country level – NUTS1)
- GF 4 (Regional statistics, only for the old NUTS structure and only available for 10 industry groups with no relevance for the subject of the MP study). These data are only available at enterprise level. These data will not be published at regional level because it could be misleading to distribute the data by using the main address of the enterprise.

Industrial accounts statistics

- REGN1 (83 Industry groups, with some variables as e.g. turnover and number of employees, partly for 2-or 3-digit NACE and with some data up to the 6-digit NACE code, but only on country level – NUTS1).
- DST estimates that for most of the maritime sectors it will not be possible to publish data under NUTS1 level due to their confidentiality rules.

Purchase and Sales by Industry

- FISK 1 (Purchase & Sales by Industry, on the basis of the VAT statistics up 6-digit NACE code maritime data for whole Denmark are available, but for main sectors this includes only the number of enterprises). These data are only available at enterprise level. These data will not be published at regional level because it could be misleading to distribute the data by using the main address of the enterprise.
- The availability of the statistical data has been checked on the basis of the DST website but it was not possible to verify the availability of all relevant statistical data for each requested NACE code.
- Furthermore it was not possible to get detailed answers concerning each NACE code from DST.

Date of joint meeting at Statistics Finland in Helsinki: 10th and 12th September 2008.

Data availability:

Geographical resolution: Most of the data are available for NUTS0 (Finland total) and for some NACE 4-digit codes and some variables also for NUTS3 and for NUTS 1-2 (minor data). Due to the rules of confidentiality (especially the secondary confidentiality) it is almost not possible to publish data for the aggregated levels NUTS2 and NACE3.

Remarks:

(1) NACE 4-digits from: 1/ Eurostat Reference database; 2/ from INSEE/CLAP database on employment (CLAP: local database of activities in NUTS 3 units). CLAP combines information from: a) the SIRENE national directory on enterprises and production units; b) the DADS database on employment, from a yearly survey; c) social security data; d) salary data for administration staff. Available years for CLAP: 2005 and 2006.

NACE 2 and 3-digits data from Eurostat and from SESSI database for quasi-mono-regional businesses (QMR) of the manufacturing industry at NUTS 2 level. QMR are only a sample of businesses in NUTS 2 units.

Remarks:

(1) – the data provided by ESTAT for this variable are also available in combination NACE 2 digits and NUTS 2 level.

The data provided by ESTAT are mostly available only on the NUTS 0 level. Only in some cases there is a higher geographical resolution available – see remark (1).

The data marked as provided by FSO or ESTAT/FSO was taken from the GENESIS-Online database. The geographical resolution of this part is NUTS 0. However based on the experience from previous projects we can assume that there are also data available on the NACE 4 digit level up to NUTS 3 level. Unfortunately because of communication difficulties with the Federal Statistical Office in Wiesbaden it was not possible to collect any data on more detailed level. Probably the more effective approach would be to contact the statistical offices of the counties directly.

The data provided by ESTAT are mostly available only on the NUTS 0 level. Only in some cases there is a higher geographical resolution available – see remark (1).

The Hungarian Central Statistical Office does not consider well based Hungary's data supply to the projected maritime database for several reasons. The share of data, which could be transferred, is very low due to the protection of individual data, and in the interest of preparing regional breakdown of data new informatic programmes would be necessary to write. Considering that Hungary's contribution to EU total on this subject is very low, HCSO would refrain from participating in this programme.

Remarks:

- (1) Not in the data base completed from Eurostat but some existing data on CSO statistics on specific key variables generally coming from other sources : V11110 : number of fishing boats, V12110 Turnover (this last one even at port level).
- (2) Available from CSO, not from Eurostat. A report: "Status of Irish aquaculture 2006", published in September 2007 and available from BIM, provides data on aquaculture production (value and volume) from 1990 to 2006.
- (3) Available from Eurostat, not from CSO (which documents a data aggregate "Mining and quarrying": NACE Code 10-14). A report by the Marine institute provides 2004 data for turnover, value added and employment, for "hydrocarbon exploration".
- (4) For some years only on the period 2000-2006 in the database completed from Eurostat: for 7122 and 612 for 2001 to 2003 only.
- (5) Not available from Eurostat, CSO, nor IMDO, which has a list of companies operating in sea shipping sub-sectors, including ship owners and operators, maritime insurance, brokers, ship banking and financing, etc.; this directory has no data for the selected key variables.
- (6) Not available from CSO for the marine/maritime sector. CSO/department of education and sciences statistics has general data on key variables such as personnel cost or number of persons employed, but without identification of marine research or training. The Marine Institute has apparently no sustainable data on that domain.
- (7) Confidential data as emphasized by CSO.
- (8) Yes, according to CSO. But no data seems to be available from Eurostat.

The Marine Institute has information available from one-off studies for turnover, value added, FTE employment, for main maritime sectors: shipping and marine transport, water based tourism, fish landing, fish processing, aquaculture, hydrocarbon exploration, gas production, offshore, renewable energy, seaweeds, marine technology, boat building, international cruise shipping. A database on companies is also available.

Remarks:

- (1) CSO can provide the information for services only
- (2) the data provided by ESTAT for this variable are also available in combination NACE 2 digits and NUTS 2 level
- (3) CSO can provide the data in current prices only
- (4) the data could be provided for entities declaring maritime activities, even if the sector is not "pure" maritime sector. The Polish Central Statistical Office maintains a database for maritime economics, where the data would be taken from.

The data provided by ESTAT are mostly available only on the NUTS 0 level. Only in some cases there is a higher geographical resolution available – see remark (1).

Central Statistical Office of Poland is able to make the following data available for the project on a commercial basis (fee 47.214,00 PLN). It is important to mention that this dataset would cover only 20% of all NACE sectors which are identified in the project.

Any other data sources made available by Central Statistical Office of Poland couldn't provide necessary resolution and for this reason are not going to be included in the database.

Note : INE has indicated availability or lack of availability of some data and the National Account department has supplied data on fishing. The Information mainly comes from the Eurostat database complemented by INE national and regional data available online.

Geographical resolution:

If considered only the data got from Eurostat the information would be available only at national level except for V 16110 but other sources (such as the two files completed by INE on fisheries show that data exist at NUTS 2 and even NUTS 3 level i.e for V16110 but for V12140 as well).

An analysis of data on sectors such as fishing and tourism shows that most of regional data exist only at NUTS 2 level.

Remarks:

- For the area "Structural Business" and "Business Activities" data for whole Sweden are available from NACE 3 digit up to NACE 5 digit (partly).
- Within the "Structural Business Statistic" data are also available from NACE 3 digit up to NACE 5 (partly) for whole Sweden.
- Regional statistical data are only available up to NACE 2 digits (or partly only for some NACE 2 digit groups). The regional data are based on a model and are not actual data (unless the enterprise only has one local unit). More detailed publishing would lead to a great number of confidentiality treatments.
- The availability of the statistical data has been checked on the basis of the SCB website but it was not possible to verify the availability of all relevant statistical data for each requested NACE code.

Remarks:

(1) NUTS 0 only for NACE 3 and 4-digits codes (all codes of the portfolio). NACE 2-digits for NUTS 1 and above.

(2) The Department for Environment, Food and Rural Affairs (DEFRA) compiles data on the UK fishing fleet, derived from the Registry of Shipping and Seamen, Department for Transport (DfT), and the DEFRA Vessel File. Data are available on the characteristics of fishing vessels and their status for licensing purposes. Fishing vessels are classified to segments, according to the type of activity they undertake most often. DEFRA also compiles the fish farming and shellfish farming businesses register. Data are collected on the name and nature of the business, address and nature of the sites at which it is carried out, species and type of fish or shellfish moved on to the site and from the site for the purpose of stocking other waters.

(3) Available directly from ONS for NUTS 3 units.

Additional remarks:

- ONS manages data series of higher resolution in terms of NACE and NUTS levels than those provided to Eurostat in relation to Maritime Affairs.
- The Reference Database includes "Number of persons employed" (V16110) as the only available variable for NUTS 1 and NUTS 2, regardless of NACE codes. At NUTS 3 level, ONS provides NACE 4-digits data for several other variables.
- Number of employees is subdivided into male and female employees for a number of NACE and NUTS codes.
