Main objective

Develop a **Skills Strategy** that addresses the main drivers of change to the maritime industry

The two sectors addressed are strongly linked and require **new capacities** in order to succeed in today's increasingly *digital, green and knowledge-driven* economy

approach to develop a strategy & action plan

Skills intelligence to great align educational opportunities and labour market by closing present and future skills gaps: **22 proposed Action Lines**

- Identified skills gaps
- Identified training offer
- Paradigm changes and future scenarios with most effective training methods
- Shortlisted Lines of Action

Validate actions and priorities suggested by the skills strategy through **11 pilot case studies involving both education providers and industry**

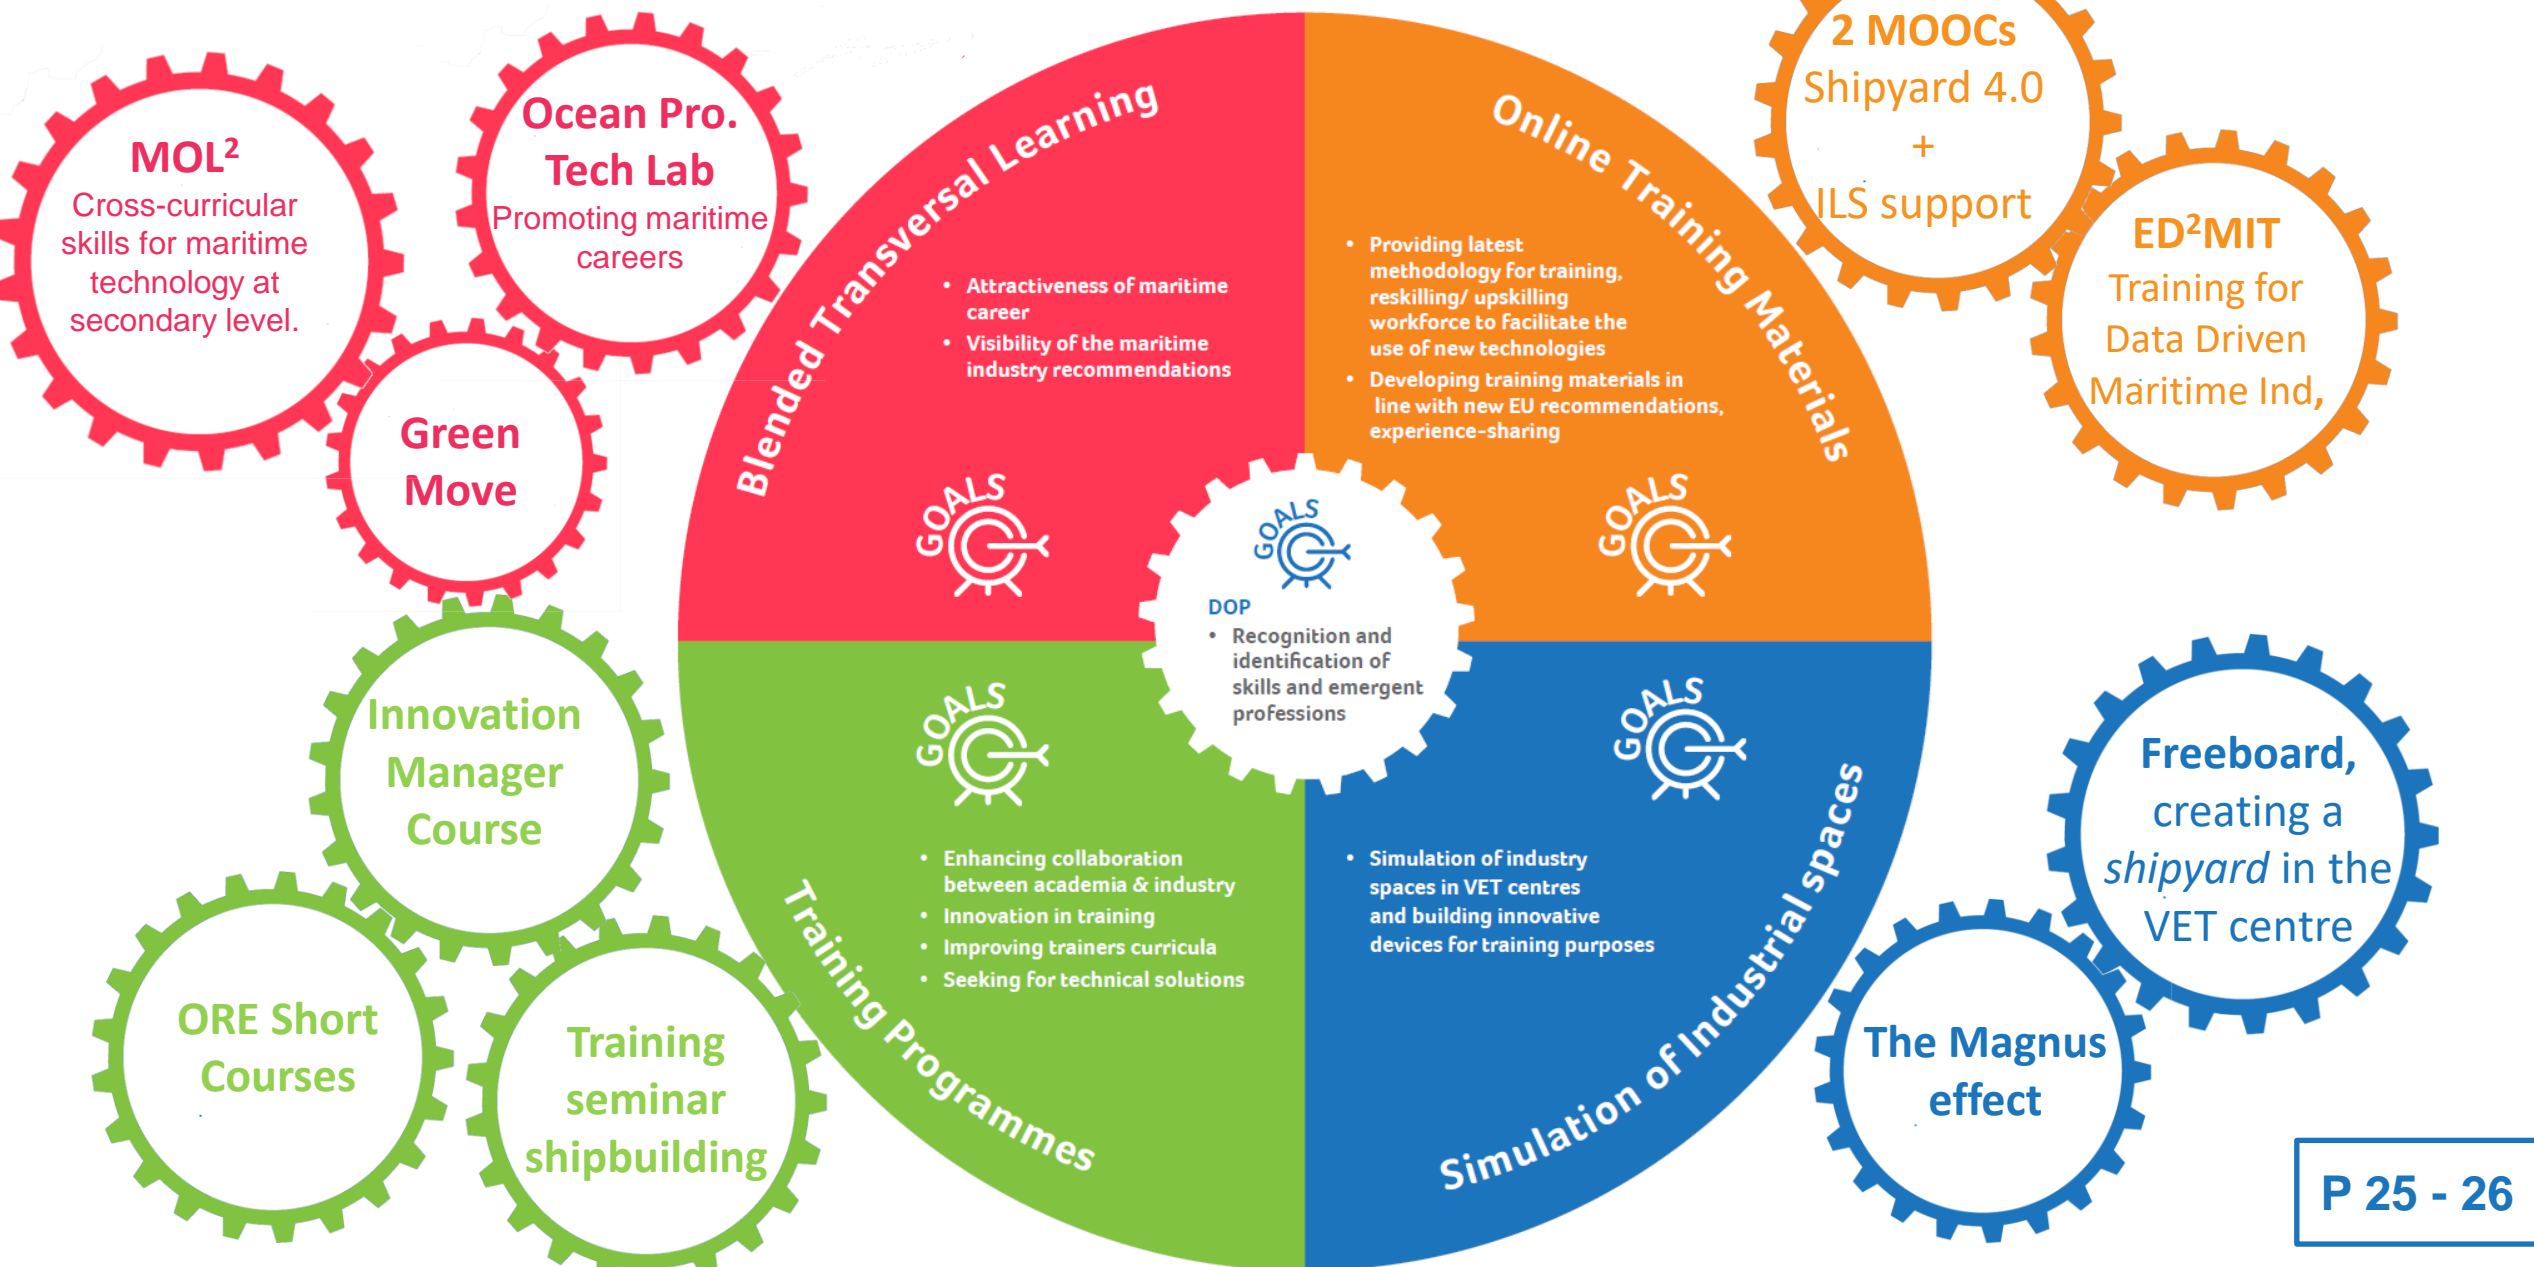

- Stakeholder feedback/assessment of the implementation

Critical review.
Feedback to the Strategy

VALIDATED Strategy and Action Plan

mates Pilot experiences to test the strategy

mates Main outcomes

VALIDATED
Strategy and
Action Plan

Maritime Technologies Skills Strategy first executive report with 32 recommendations to the main stakeholders groups. A final version of the report will be released during the first quarter of 2022. Long-term Action Plan and Sustainability

Marine Training

All results transferred to the **Marine Training Platform**. 946 trainings addressing ORE and SB, classified (EQF level, Country, language...). All training materials produced.

MATES Skills Strategy is being transferred to the Large Scale Partnerships addressing Maritime Technologies in the **Pact for Skills**:

- [Shipbuilding Partnership](#): coordinated by Sea Europe
 - [Offshore Renewable Energies \(ORE\) Partnership](#): Coordinated by CETMAR
- VISION**

Organisations involved in the capacity building process for the ORE are invited to join us in the Pact for Skills. Contact: mates@cetmar.org

mates Some impact figures

183 companies, schools & training centres reached

199 industry representatives and teachers involved in design & delivery

482 & 551
(Shipbuilding) (Offshore Renewable Energy)

Educational & training programmes mapped

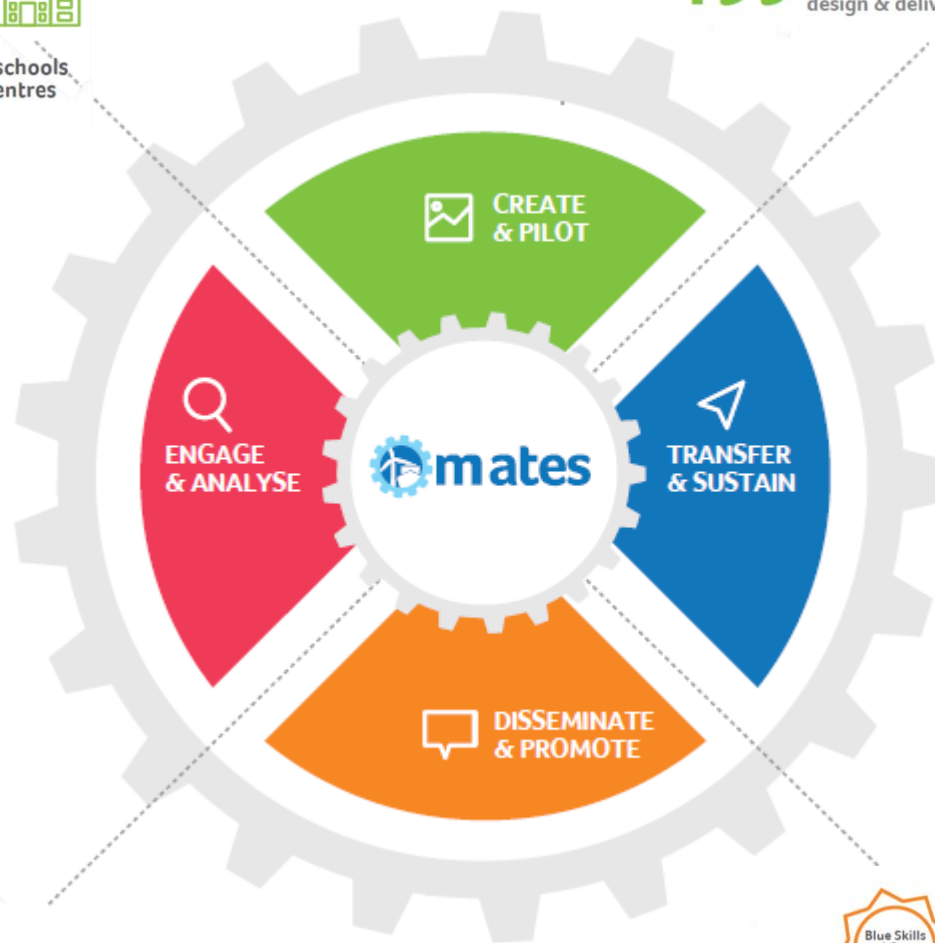

1600+

Participants at 54 MATES workshops & events

MATES represented at **320+** events attended by **39,600+** people

ESCO v1.1
18 new skills and **5** new occupations added

Results included in the EC's **The EU Blue Economy Report 2021**

Results included in the EU Offshore Renewable Energy Strategy 2020

Atlantic Project Award

ATLANTIC ACTION PLAN

- **Skills needs are constantly evolving, and the rhythm accelerates:**

Skills ecosystems: meeting points for the most relevant stakeholders from industry, academia and research

Transversal skills: increasing importance

Adaptation to remote learning (on-line or blended)

- **Need to recognize the effort of cooperation among different stakeholders to provide skills intelligence and trainings.**

Cooperation among industry and education community requires a huge effort: different working rhythm, different targets...and at the end of the day, they are evaluated by other type of activities (contracts achieved, trainings developed/LLL of teachers, publications...but not for bridging the gap among education and industry)

- **Getting expected impact in the project life is challenging:**

Official recognition of new trainings is a long process: project life usually only allows to start the process.

Long-term sustainability: combining open-access with business exploitation / knowledge transfer process for appropriation of results may only start during the project life

mates
Invitation to
MATES Final Conference

Tuesday 29 of March from 10 until 13 CEST

Please register [here](#) to join us, either in presence or online.

Thank You
