*Tá an eolaíocht ag fianaise cumhacht na farraige chun muid a leigheas. Tá sláinte na farraige agus sláinte daoine fite fuaite ina chéile. Má dhéanaimid an fharraige a athshlánú, déanaimid muid féin a athshlánú.*

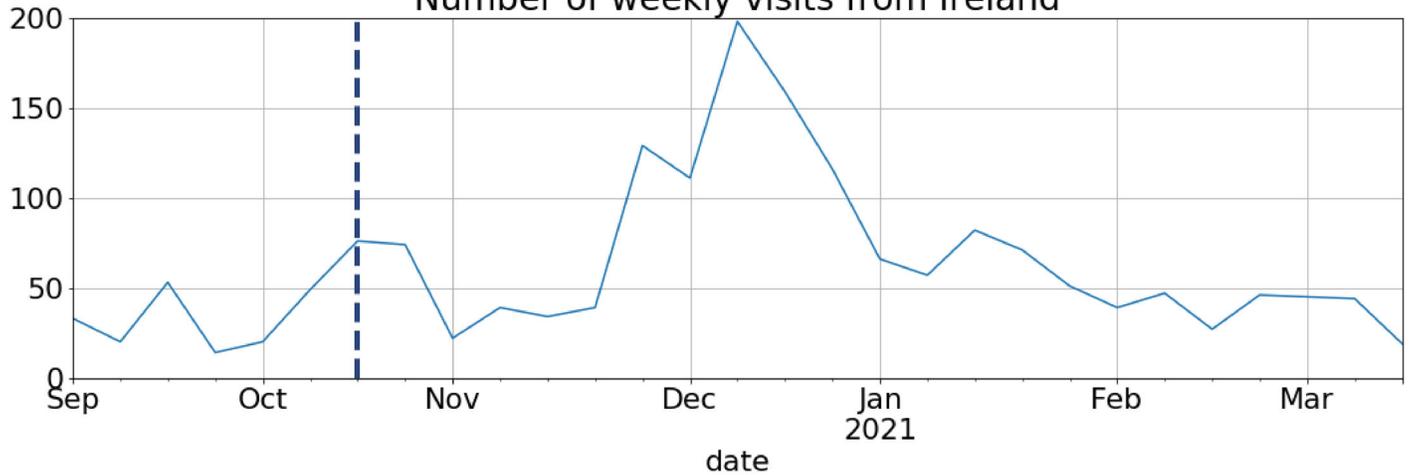

Science is evidencing the power of the sea to heal us. The health of the ocean and health of humans are completely interconnected. If we restore the sea, we restore ourselves.

Dr. Easkey Britton, PhD  
Surfer & Marine Social Scientist

Η θάλασσα αποτελεί πηγή ζωής, ηρεμίας, έμπνευσης και ευτυχίας για τους ανθρώπους. Η θαλάσσια βιοποικιλότητα είναι ανεκτίμητη. Σήμερα, καταστρέφεται χωρίς έλεος. Μάθε και δράσε!

*The sea is a source of life, tranquility, inspiration, and happiness for humans. Marine biodiversity is precious. Nowadays it is destroyed with no mercy. Learn and act!*

**Stella Vareltsidou / Στέλλα Βαρελτζίδου**  
Conservation Biologist, Former Scientific Coordinator of the Axios-Loudias-Aliakmonas Protected Area and sea lover

O Oceano como bem maior para a segurança do planeta enfrenta sérios problemas que necessitam de políticas globais. Promover uma boa governação baseada no conhecimento científico requer cidadãos informados que apoiem a evidência científica, o que se tornou ainda mais importante em tempos de pós-verdade, notícias falsas e crenças pós-factuais.

*The Ocean, as a major asset to the security of our planet, faces serious problems which must be addressed by global policies. Enabling good governance based on scientific knowledge requires literate citizens supporting scientific evidence. This becomes even more important in times of post-truth, fake news and post-factual beliefs.*

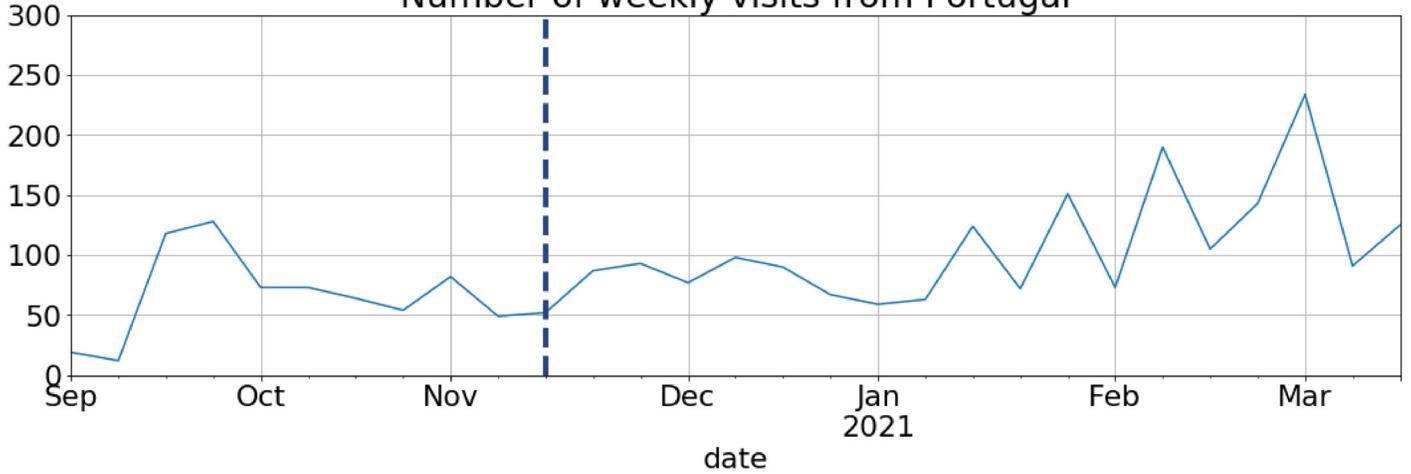

**Ricardo Serrão Santos**  
Minister of the Sea of Portugal

*Dit is de eeuw van de oceaan. Maar de oceaan verandert snel door de klimaatcrisis. Een gezonde oceaan zal een belangrijk deel van de oplossing zijn. Dat vraagt grote investeringen in multidisciplinair oceanonderzoek. Nu.*

*We live in the Century of the Ocean. But the ocean is changing rapidly because of the climate crisis. A healthy ocean will be a significant part of the solution. This will require large investments in multidisciplinary ocean research. Now.*

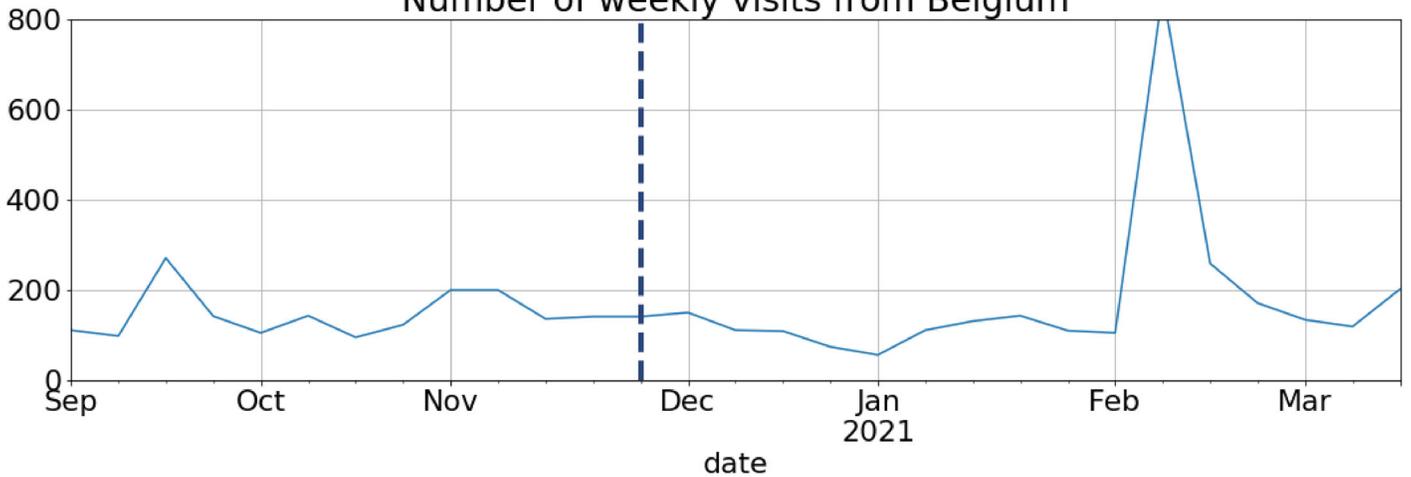

**Prof. Dr. Jan Mees**  
General Director VLIZ, Flanders Marine Institute, Oostende, Belgium

Reușim să înțelegem valoarea mării doar cunoscând în detaliu ce se întâmplă în apele sale. Doar așa vom putea să empatizăm și să simțim efectul pe care îl producem cu fiecare gest pe care îl facem.

We can only really appreciate the value of the sea by knowing in detail what is happening in its waters. This knowledge allows us to empathise, and fully understand the consequences of our actions.

**Mihaela Mirea Cădea**  
Executive director, Mare Nostrum NGO

Czech

January 05, 2021

Vznik a rozvoj života v celé jeho dnešní rozmanitosti je pevně propojen s oceánem. Chraňme proto přírodní bohatství moří a využívejme jejich nezměrné zdroje pouze s největší rozvahou.

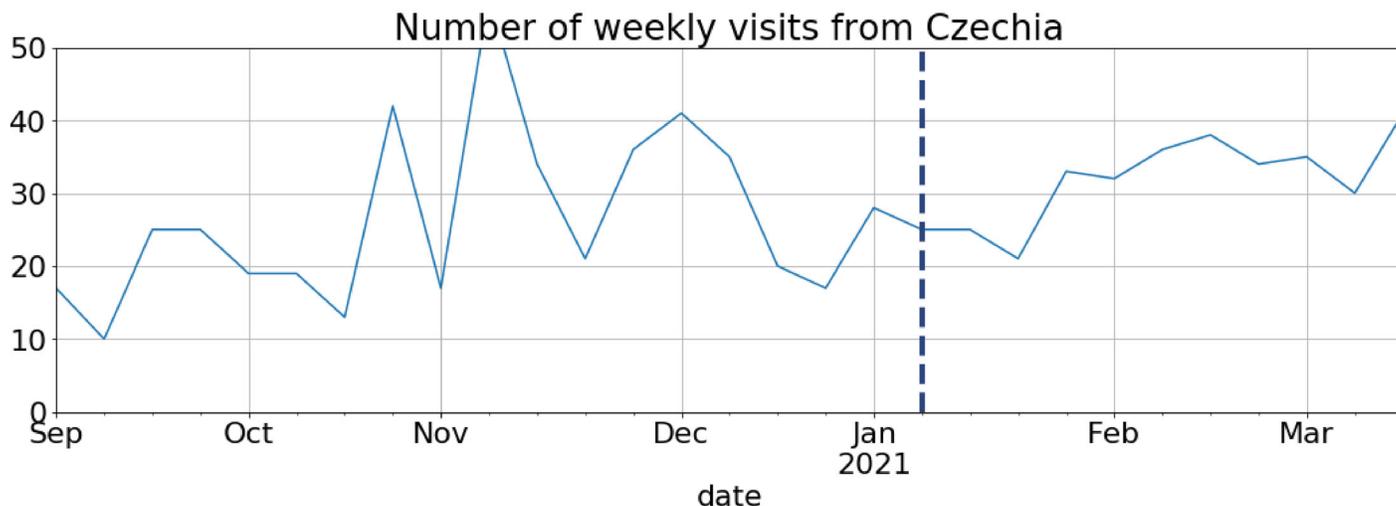

Evolution and life itself are intimately linked to the world oceans. The protection of ocean ecosystems and the mindful use of their resources are paramount to our survival.

**Dr Michal Koblížek, Ph.D.**  
Scientist, Institute of Microbiology  
The Czech Academy of Sciences

С увеличаване на знанията ни за морето и развитието на технологиите, синята икономика разкрива все по-големия си потенциал да дава решения за устойчиво и природосъобразно развитие.

Морето винаги е било и ще бъде неизменна част от нашето битие и дух, неизчерпаем източник на творческо вдъхновение.

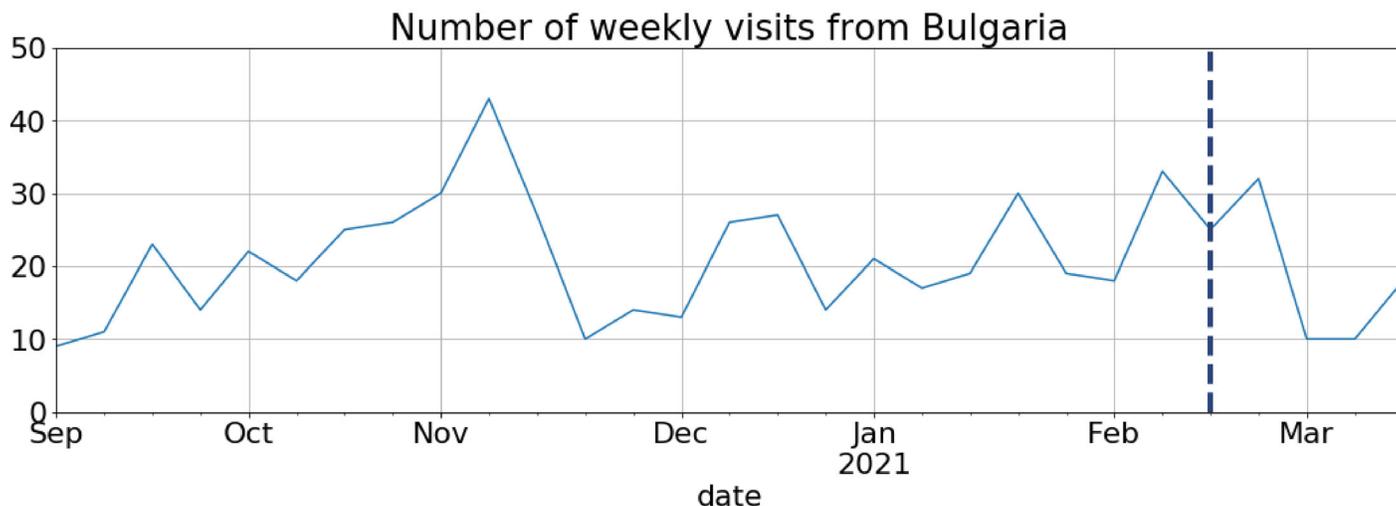

*Increasing our knowledge about the sea and technological advancement open up huge potential of the blue economy to provide solutions for sustainable and environmentally-friendly development. The sea has always been and will be an unwavering part of our being and spirit, an incredible source of inspiration and creativity.*

**Charlina Vitcheva**  
Director-General for Maritime Affairs and Fisheries (DG MARE)  
European Commission
