

EMODnet-Copernicus Marine Service 8th Coordination meeting

EMODnet Human Activities

Alessandro Pititto (Cogea – Bip Group)

20 October 2023

EMODnet Human Activities | Workplan priorities

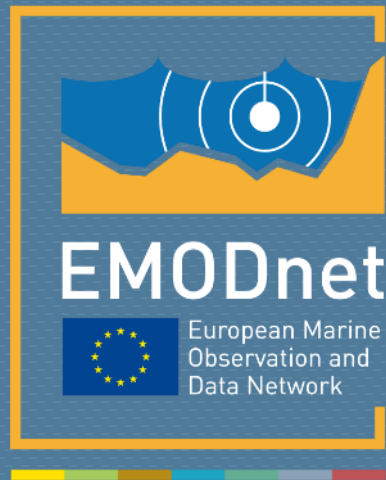

- Expanding the portfolio of fishery-related data (e.g. TACs & quotas). Specific request from MARE
- Retrieving shapefiles of Maritime Spatial Plans from the Member States
- Increasing coverage of aquaculture data sets (use of satellite images is being explored)
- Increasing coverage of pipelines and cables
- Creating a new data theme on coastal tourism

EMODnet Human Activities | *In situ* data flows

- None

EMODnet Human Activities | Data products/sets

Aggregate extraction	Ocean energy facilities	Oil and gas (platforms, wells, licences)
Algae production	Marine protected areas	Pipelines
Aquaculture farms (finfish, shellfish, freshwater)	Fishing intensity	Vessel density
Cables	Fishing effort	Waste disposal
Cultural heritage	Fish catches	Other (EEZ, coastline, etc.)
Desalination	Port traffic	
Dredging	Maritime Spatial Planning	
Wind farms	Military areas
