

EU MISSION

'Restore our Ocean and Waters by 2030'

Digital Ocean and Waters Knowledge system

2022

[#MissionOcean](#)

[#Eumissions](#)

[#HorizonEU](#)

Why a European Digital Twin Ocean?

Support the Mission

PROTECT AND RESTORE MARINE AND FRESHWATERS ECOSYSTEMS AND BIODIVERSITY

PREVENT AND ELIMINATE POLLUTION OF OUR OCEANS, SEAS AND WATERS

MAKE THE BLUE ECONOMY CARBON-NEUTRAL AND CIRCULAR

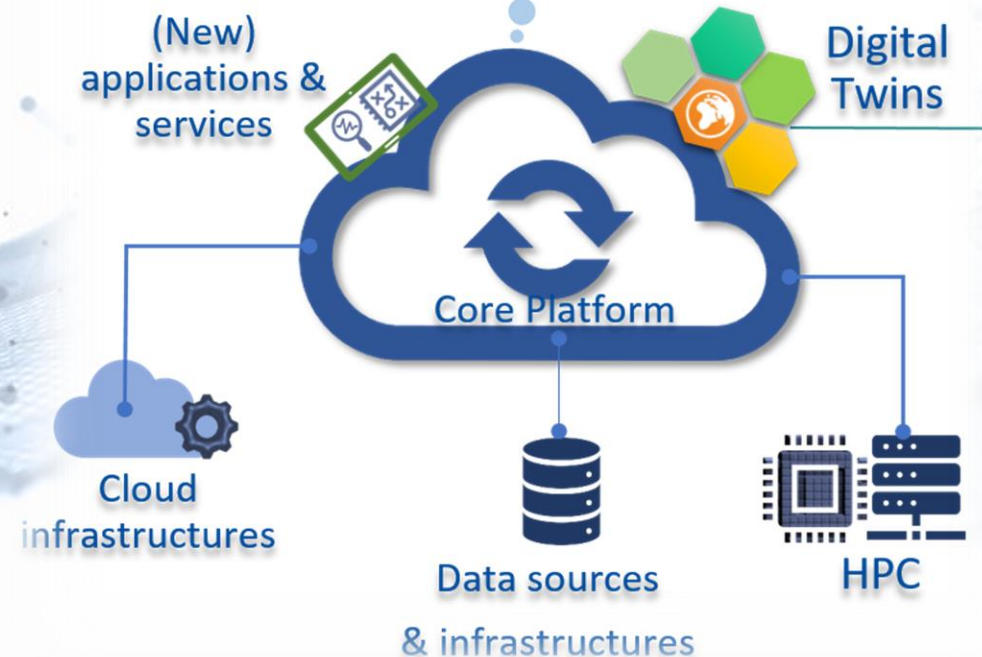

Cross-cutting enablers for the mission:

- Digital Ocean and Water knowledge system
- Public mobilisation and engagement

Part of DestinE

Climate adaptation, extrêmes and geohazards
Ocean, biodiversity, urban

The EU DTO, an international commitment from the von der Leyen Commission

“Today, we know the ocean is vulnerable and is threatened by our misdeeds. Pollution, chemicals and the overexploitation of marine resources. The ocean is too large for any one of us, and yet so fragile that our individual actions matter. ...

*... Every problem is an opportunity for innovation. But we need a clear and ambitious objective. We need a mission, like the European Green Deal. **That is why we have launched the ‘Mission to restore our ocean and waters by 2030’***

... Finally, the ocean is still largely a great mystery for humankind.

That is why Europe is building a digital twin of the ocean.

We are connecting our assets – like the Copernicus satellites, marine infrastructure like icebreakers, buoys and underwater drones, and high performance computing. We will gather the raw data and turn it into real-time knowledge and longer-term predictions.

We are putting the power of the digital revolution at the service of our climate. ...”

Structuring & integrating the ocean knowledge value chain **FOR** ocean actors

TO:

- Support science-driven approaches to policies implementations by users: ecosystem-based management of marine habitats/green infrastructure, planning and management of marine areas, safeguard productivity and biodiversity of marine ecosystems, etc.
- Support industry to develop new business models, sustainable green services, and opportunities in ocean data and related services
- Increase citizen engagement & empowering citizens in innovative co-designed services and projects, enable the infusion of 'non-scientific data streams'

HOW:

- By Integrating and connecting wide range of data and models (from physics to socio-economics) with cloud infrastructures, HPC, AI
- by providing development kits, interfaces and visualization tools for "what-if" scenarios and decision support

« A core infrastructure, conceived as a public good »

An EU endeavour already ongoing

Digital Ocean Forum

High Level Event

» April 21st
8:30 AM - 1:00 PM (CEST)

French Ministry of Higher Education,
Research and Innovation,
25 rue de la Montagne Sainte-Geneviève
75005, Paris (close to the Pantheon)

EU French presidency event

Co-organised with DG MARE, RTD, DEFIS, CNECT, JRC

70 experts - 20 countries

To align ambitions for a EU DTO with:

- A 2024 milestone
- A service portfolio and architecture
- 8 additional shared recommendations

EU contribution to
UN decade

4 to 5 May 2022

2021 United Nations Decade
of Ocean Science
2030 for Sustainable Development

DITTO - Digital Twins of the Ocean

International Digital Twins of the Ocean Summit

Mission:

- develop and share a common understanding of digital twins of the ocean
- establish best practices in the development of DTOs
- advance a digital framework for DTOs for professionals to create their own digital twins

An EU endeavour already ongoing

Science-base

EU Core Digital Twin Ocean

- Horizon Europe:
 - Projects: Blue Cloud, Immerse (Adv Nemo models), Obama-Next, MarcoBolo, Biocean5D, Marbefes (marine and coastal biodiversity and ecosystems)
 - Calls: HORIZON-INFRA-2022-EOSC-01-03: FAIR and open data sharing in support of healthy oceans, seas, coastal and inland waters; HORIZON-CL4-2022-SPACE-01-41: operational ecosystem models from space, HORIZON-CL6-2022-CLIMATE-01-02: Understanding the oceanic carbon cycle
 - Sustainable Blue Economy Partnership: Member States DTO initiatives
- Infrastructure for EU DTO:
 - EDITO (Mercator Ocean, Flanders Marine Institute), 3M€
 - Data:
 - Integration of biodiversity monitoring data into the Digital Twin Ocean, 10M€
 - Models:
 - Underlying models for the European Digital Twin Ocean, 7M€
 - Services & Interfaces:

ILIAD, 19M€
