sissy@hnodc.hcmr.gr

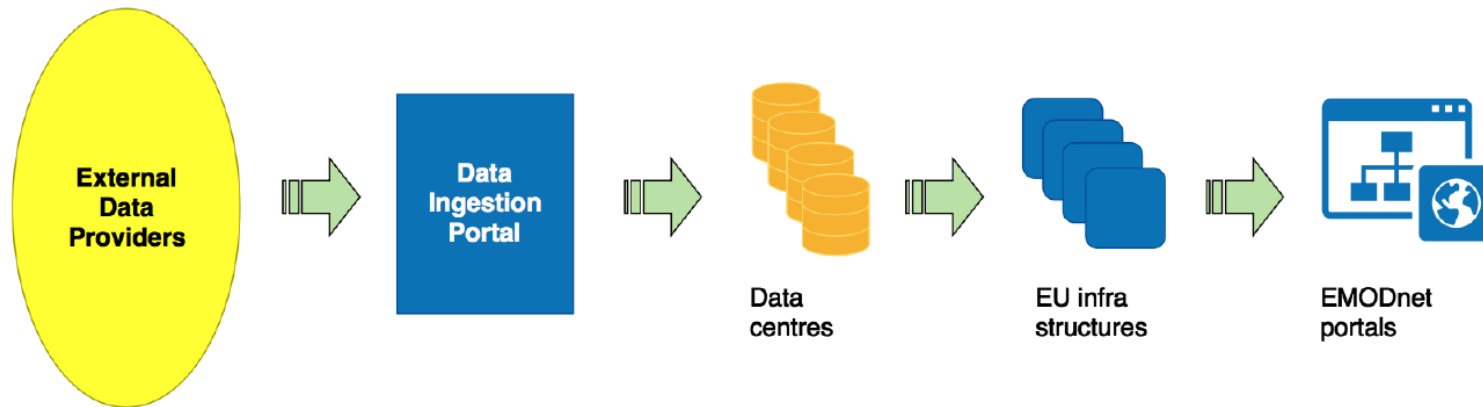

EMODnet Ingestion: project workplan

- EMODnet Ingestion 3 contract started on 30/03/2022
- Plenary progress meeting 12-13 April 2023 – Larnaca - Cyprus
- Annual Interim Report submitted M13 showing good progress in all activities, except centralisation

Work Package No.	Work Package title	Covering tasks
WP0	Project Management	Task 6 – EMODnet tuning Task 10 – service continuity (transfer strategy part)
WP1	Construct and operate central Data Ingestion portal with services	Task 1 - web-portal Task 5 – tracking service Task 7 – summary service Task 10 – service continuity (technical configuration part)
WP2	Implement and operate pathways	Task 2 – pathways Task 4 – help service
WP3	Facilitate machine-to-machine transfers	Task 3 – machine-to-machine
WP4	Marketing and outreach	Task 8 – outreach Task 9 – coastal and offshore license data

Project Objectives and approach

- ⦿ To **identify, encourage** and **support data holders** (from public and private sectors) to **share their data** with EMODnet by teaming up with EU data management infrastructures.
- ⦿ To operate the **EMODnet Ingestion portal/platform** to **facilitate data holders submitting marine data** sets for publishing, further processing and safekeeping by expert data centres, and subsequent **distribution through EMODnet** thematic portals as **open data**.
- ⦿ Use is made of standards, best practices, and existing marine data management infrastructures, data centres and pathways* towards the EMODnet data portals

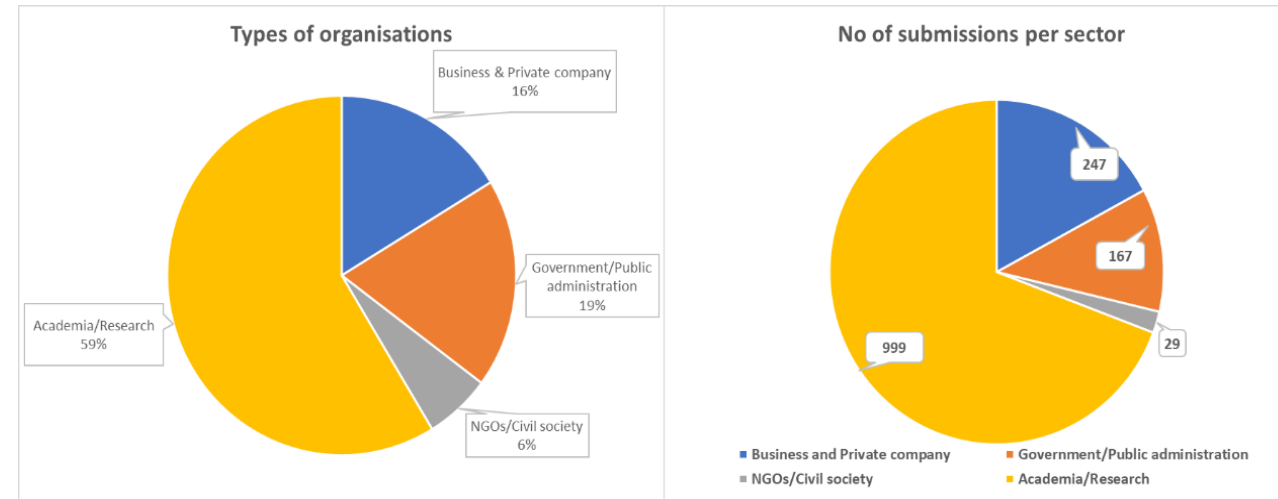

Workflow from submission to elaborating and processing for publishing in EMODnet

- ⦿ * *Data Centres, SeaDataNet, EurOBIS, EGDI, ICES, CMEMS-INSTAC, and others*

Progress on data submissions

- 🎯 **Phase I:** publishing 'as is'.
- 🎯 **Phase II:** elaborated and integrated in European and EMODnet thematic portals

- **1300 submissions in total, Phase I-II**
 - **Circa 600 Phase II**
 - **Circa 200 organisations**

Machine-to-Machine exchanges

SEARCH DATA	DOWNLOAD SOFTWARE	LOOK-UP VOCABULARIES
ACCESS PRODUCTS	ACCESS METADATA CATALOGUES	PUBLISH YOUR MARINE DATA
SENSOR WEB VIEWER DEMO	DISCOVER INTERNATIONAL DATA	VIRTUAL RESEARCH ENVIRONMENT

Coupling with SeaDataNet SEANOE data citing service: EMODnet Ingestion encourages researchers and data originators to submit their data to SEANOE and to get a DOI that helps to increase their citation indices and obtain wider recognition. So far more than 250 entries exchanged, with 53% are in Phase I and 16% in Phase II.

Coupling with The Crown Estate (TCE) Marine Data Exchange underway: TCE collects all marine environmental data from the offshore wind industry in UK and leases sites for renewable energy, cables, pipelines and marine aggregates within the EEZ. TCE holds the MDE database with more than 250 Tb of marine industry data. A selection of the MDE metadata records, namely those concerning marine data sets, are harvested and made available via the MEDIN Discovery portal. An initial conceptual mapping between MDE and Ingestion metadata standards was successful and a JSON export file with selected MEDIN metadata fields was produced making use of JSON elements as already in use by Ingestion. During import to the Ingestion service, some issues raised that are currently being reviewed by the corresponding teams from NOC-BODC, MARIS and HCMR.

Year	Dataset Title
2015	EMIL Zone 7 - Humber Bay, Geophysical Survey
2011	Brown and May Marine Ltd., Guddest Sands Offshore Wind Farm, Post Construction Fish Survey
2003	BMAPN, BMAPN 2002 Review
2009	Wessex Archaeology, Humber Gateway Offshore Windfarm, Archaeological Assessment of Geophysical Data
2017	ESL, Lincs Offshore Wind Farm, SAG Clearance Survey 2017
2016	MARINAC Ltd, Kyle Wind, West of Humber Acoustic Doppler Current Profiler Survey
2008	Maritime Archaeology, Guddest Sands Offshore Wind Farm, Monitoring of Archaeological Exclusion Zones
2010-2012	EMIL Zone 9 Cable Array, Hydrodynamic Campaign
2004	Osira Project, London Array Offshore Wind Farm, Geophysical Surveys

Close cooperation with EU EuroFleets+ project

- Ensuring that research data collected during funded cruises, and the en-route data collected by the vessels are made widely available in line with FAIR and Open Research Data principles
- Publication on EVIOR portal (European Virtual Infrastructure in Ocean Research – embedded in EF+ website) and SeaDataNet and EMODnet portals.
- Cooperation with EMODnet Ingestion:
 - adopting **SWE data exchange** from sailing vessels to dashboard
 - PIs ingest data sets for further processing and uptake in SeaDataNet and EMODnet (already 22 published submissions)

View submissions

This service allows users to search and download the datasets that have been submitted via the Submission service and that have been reviewed and completed in metadata by assigned data centers. These datasets are published “as-is” and will be further inspected and elaborated, where possible, for uptake in the national and European infrastructures supporting EMODnet. Once elaborated and included, users can also find the URLs of the European data infrastructures. See also [Conditions of Use](#).

Results

Data from Eurofleets+ BENCHMARK cruise

Period: 2021-08-01 - 2022-08-10

Observation type: Biota abundance, biomass and diversity, Currents, Gravity, magnetics and bathymetry, Water column temperature and salinity

Data from Eurofleets+ PHYCOB cruise-Part I: CTD + nutrient data

Period: 2021-09-11 - 2021-09-17

Observation type: Nutrients, Water column temperature and salinity

Hydrographic dataset from the Eurofleets+ SINES 2022 research cruise in the Iberian Upwelling System

Period: 2022-09-11 - 2022-09-20

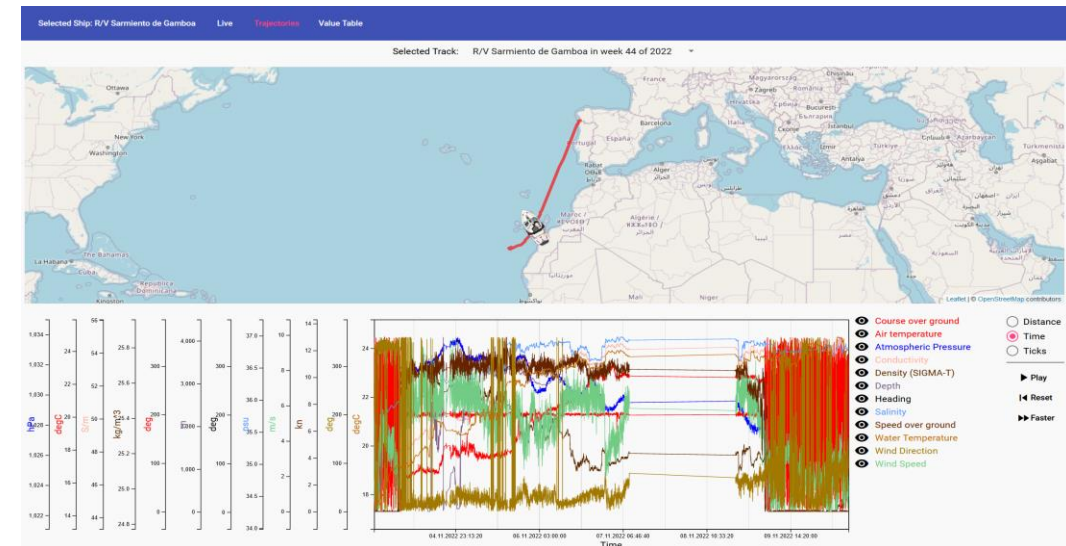

Observation type: inapplicable

European Virtual Infrastructure in Ocean Research (EVIOR)

Sharing information on planned, current and completed cruises and on details of European research vessels and specialized equipment. Giving e-access to underway events information, sailing tracks and current position of European research vessels

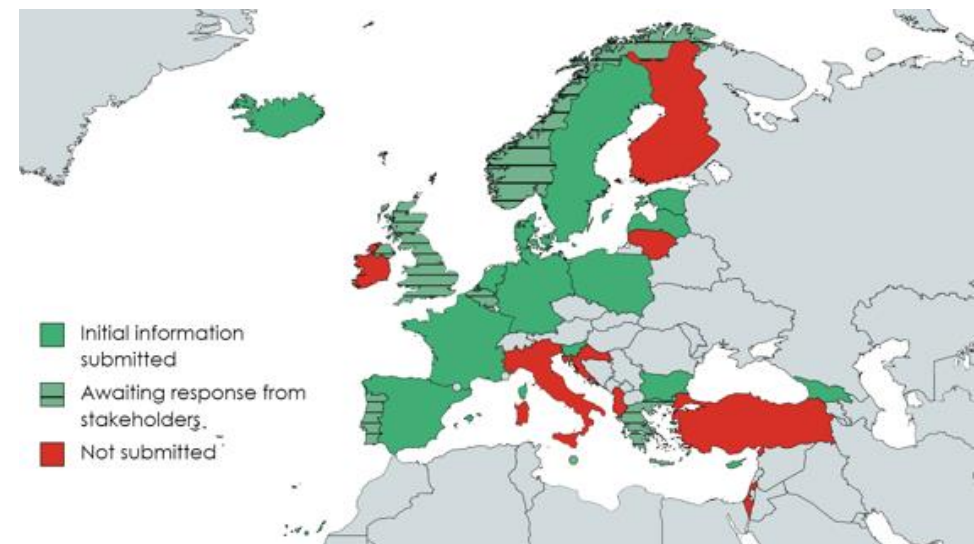

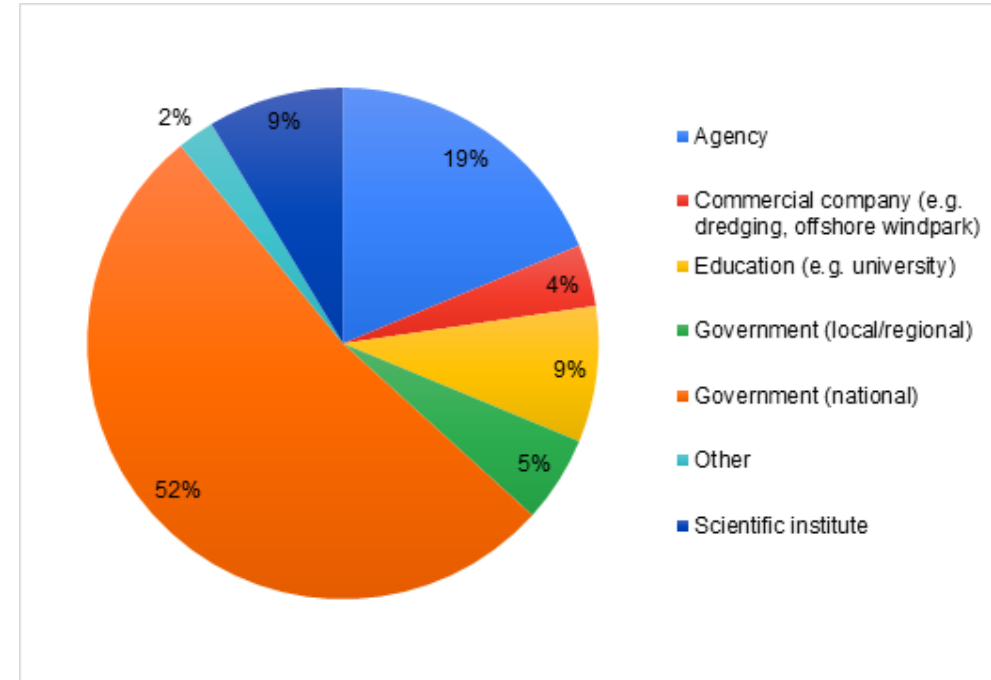

Engagement of coastal & offshore license data

- Extra emphasis is given to **improve** and document the **availability of data provided for coastal and offshore licensing** (for aquaculture and offshore renewable energy):
 - Identify stakeholders (license authorities per country and sector)
 - Analyse license procedures for data monitoring and reporting, and long-term data management
 - Discuss findings with stakeholders, aiming at a more harmonised and effective approach, benefitting the European marine data exchange

February 2023: **D4.4 - Inventory of identified stakeholders for licensing data** released: in total **128 stakeholders** were identified in **27 countries**. More than half (52%) of the identified stakeholders were national governments from different ministries such as the Ministry of Energy, Ministry of Renewable Energy, Ministry of Environment and Water and the Ministry of Agriculture. This is followed by agencies (19%) and education such as universities and scientific institutes (9%).

Activities now focused on drafting **D4.5 - establishing a baseline assessment or inventory of data collection and licensing processes in each country**. Map shows status per mid April 2023

Migration to Central Portal

- ⦿ Process started in April 2023
- ⦿ Adopted principles for migration:
 - ⦿ Own narrative site like all thematics
 - ⦿ Extra “how to contribute data” page, leading to Ingestion
 - ⦿ Submission service => to move from Marine-ID to ECAS
 - ⦿ View Submissions service => records to be integrated in CP Products Catalogue by harvesting
 - ⦿ View NRT stations and data streams => customised map to be integrated in CP Map Viewer
- ⦿ Analyses are underway, that should lead to specifications for technical deployment
- ⦿ Target deadline: end March 2024

Forward look

- ④ To identify and interact with **more** external data providers which will lead to more **submissions** and **EMODnet engagement** as well as **education of data providers in data management standards and procedures**
- ④ To identify, convince and support **more** operators of oceanography observation platforms and networks to **connect & share their NRT data streams to the EU operational Oceanography data exchange**
- ④ To gather, map and document the data flow procedures in European countries related to coastal and offshore licensing, interacting with the earlier identified stakeholders,
 - ④ To build a structured database of these practices per country and sector
 - ④ To analyse these procedures and discuss these at a workshop with stakeholders aiming for ideas for best practices
- ④ To analyse migration plans for EMODnet Ingestion portal and services
